Japanese Educational Influence Survey Questionnaire

Prof. Yokuo Murata
(Institute of Education, University of Tsukuba)
Research Leader, "Experiential Comparative Study Group on the Japanese Educational Influence over Asian Nations"

With the support of the Japan Comparative Education Society, our group is undertaking a three year research project to study "how Japanese education is understood, evaluated, and adopted into Asian nations." The goal of this project is to learn how Japan can cooperate with and contribute to education in other Asian countries. Countries in this study include the Republic of Korea, the People's Republic of China, Thailand, Malaysia, Singapore, the Philippines, and Indonesia.

This questionnaire is part of this project and is intended to explore "what are the unique Japanese characteristics of education and training in Japan." Among those who have been asked to respond to this questionnaire are former foreign students who studied in Japanese universities and graduate schools as well as former foreign trainees who received technical training in Japan through JICA (Japan International Cooperation Agency) and AOTS (Association for Overseas Technical Scholarship). We would like to ask you to contribute your opinion to our study by responding to the enclosed questionnaire. If this project is to succeed, it is indispensable to listen to the opinions of those who have had the experience of studying in Japan.

We are sorry to interrupt your busy schedule, but we would be most grateful if you could answer this questionnaire using the procedure described below and return it to us in the enclosed envelope by January 20th, 1998.

You need not to write your name on this questionnaire and can rest assured that your answer sheet and the study results will never be used for anything other than this project.

If the project objectives are agreeable with you, I would like to kindly request your cooperation.

[Questionnaire Procedure]

1. Please write your answers on the (white) answer sheets and return only those sheets to us.
2. Questions ending in (____) require selection of an answer from a predetermined set of replies while questions ending in [_____] require descriptive type answers. In responding to questions requiring descriptive type answers, please feel free to write in the language you are most comfortable with (e.g. mother tongue, English, etc.).
Evaluation of Japanese Education and Training

- "Categories of Japanese education and training" from A to M are listed below along with concrete examples.
