CONTENTS

	page
INTRODUCTION	1
BACKGROUND	
<i>Transcriptional regulation by retinoids</i>	5
<i>Effect of retinoids on the endothelial cells</i>	8
<i>Retinoids and the liver</i>	10
ABBREVIATIONS	13
CHAPTER I	14
Up-regulation of the gene expression of uPA through physical interaction between RAR and Sp1	
I-1. Introduction	15
I-2. Materials and Methods	17
I-3. Results	24
<i>Induction of uPA through RAR</i>	24
<i>Involvement of Sp1 and GC box in the induction of uPA by retinoid</i>	29
<i>Physical interaction between RAR and Sp1</i>	34
I-4. Discussion	41
I-5. Summary	45
CHAPTER II	46
Molecular mechanism of transcriptional regulation via physical interaction between RAR and Sp1: Analysis on a role of RAR/RXR-derived transactivation	
II-1. Introduction	47
II-2. Materials and Methods	48
II-3. Results	51
<i>RAR interacts with the C-terminal region of Sp1</i>	51
<i>Examination of a role of RAR/RXR as transactivator</i>	54
II-4. Discussion	60
II-5. Summary	62

CHAPTER III	63
Anti-angiogenic effect of retinoid is partially mediated by TGF- β	
III-1. Introduction	64
III-2. Materials and Methods	66
III-3. Results	68
<i>Neutralization of anti-angiogenic activity of retinoid with anti-TGF-β antibody</i>	68
III-4. Discussion	71
III-5. Summary	73
CHAPTER IV	74
Exacerbation of the liver fibrosis by retinoid via TGF- β	
IV-1. Introduction	75
IV-2. Materials and Methods	76
IV-3. Results	82
<i>9,13dcRA levels are increased in in vivo fibrotic liver and in activated HSCs</i>	82
<i>Effect of 9,13dcRA on HSC culture</i>	82
<i>Enhancement of fibrogenic mediators by 9,13dcRA</i>	92
<i>Acceleration of hepatic fibrosis in rat livers by exogenously added retinoid</i>	95
IV-4. Discussion	100
IV-5. Summary	104
CONCLUSION	105
