Acknowledgments

I would like to express my deep thanks to all those who offered me guidance, help and encouragement during the preparation of this dissertation.

Most of all, I would like to express my sincere appreciation to Professor Kazuo Murakami, Institute of Applied Biochemistry, University of Tsukuba, for his support and encouragement.

I wish to express my deep thanks to Associate Professor Tadashi Baba, Institute of Applied Biochemistry, University of Tsukuba, for his excellent direction, suggestion and encouragement through this work.

I am grateful to Drs. Hiroaki Shimada, Tsutomu Kawasaki, and Satoru Okumura, Mitsui Plant Biotechnology Research Institute, and Dr. Yuji Arai, for their valuable advice and discussion. Thanks are also given to Dr. Hikaru Satoh, Institute of genetic Resources, Plant Genetic Laboratory, Faculty of Agriculture, Kyushu University, for his kind supply of EM-series rice seeds and technical support.

I am wish to thank Mr. Eiki Kobayashi, Mr. Shigehiro Yamada, Mr. Nobuhisa Kono, Mr. Ken-Ichiro Tanaka, Mr. Masato Tachibana, Miss Junko Terakado, Miss Sato Tokui, Mr. Keitarou Murayama, and Mr. Kazuo Yamagata, for their continuous encouragement and valuable discussion.

Finally, I would like to give my special thanks to my parents and my sister. Without their supports, it would not possible to carry my research.
