LIST OF TABLES

1 Occurrence of the planktic and benthic foraminifers in the Suai Formation along Suai and Lembong Road 73
2 Occurrence of the planktic and benthic foraminifers in the Sibuti Formation along Miri-Tinjar Road 77
3 Occurrence of the planktic and benthic foraminifers in the Sibuti Formation along Suai, Niah, Ladang 3 and Kuala Sibuti Road 80
4 Occurrence of the planktic and benthic foraminifers in the Sibuti Formation along Kuala Sibuti, Sibuti outcrop section, Miri-Tinjar and Miri-Bintulu Road 84
5 Occurrence of the planktic and benthic foraminifers in the Lambir Formation along Miri-Bintulu and Miri-Tinjar Road and the Miri Formation along the New Hospital Road 90
6 Distribution of planktic foraminifers from the Northwest Borneo Basin 100

LIST OF FIGURES

1 Geological map of the Northwest Borneo Basin (enclosed in back folder) 2
2 Location map of the study area 3
3 Town centres and rivers of Sarawak 4
4 Geological map of Sarawak (modified after Hon, 1992) 7
5 Geological map of the Northwest Sarawak (after Liechti et al, 1960) 9
6 Stratigraphical section across the central Sarawak (after Ho, 1978) 10
7 Stratigraphic subdivision and paleontological zonation in the Tertiary of Sarawak (after Ho, 1978) 12
8 Workscope of the present investigation 14
9 Global tectonic division (after Hamilton, 1979) 15
10 Plate tectonic elements of South East Asia (after Hutchison, 1989; Rangin et al, 1990 and Metcalfe, 1995) 17
11 Tectonic provinces of the Sarawak and adjoining areas 18
12 Geological map of West Sarawak and Northwest Kalimantan 19
13 Generalized stratigraphy of Sarawak and Northwest Kalimantan 20
14 Geological development of Sarawak and Northwest Kalimantan 23
15 Tuang Schist of the Tuang Formation, Early Cretaceous Melange, West Sarawak. Locality: Km 4, Stephen Road, Kuching
16 Lubok Antu Melange. Locality: Batang Ai Dam Road junction, Lubok Antu

17 Kayan Sandstone, Isolated Basin unit overlies unconformably the tightly folded Cretaceous Pedawan Formation. Locality: Km 13, Bau-Lundu Road

18 Basal conglomerate of the Tatau Formation, Isolated Basin overlies unconformably the tightly folded Bawang Member, Belaga Formation, North Sarawak. Locality: Km 170, Sibu-Bintulu Road

19 Development of lithostratigraphy of Northwest Sarawak

20 Index of topographic map sheet 1:50,000

21 Traversed route map

22 Typical bedding sequences of Northwest Borneo Basin

23 Massive sandstone bed of the Lambir Formation. Locality: Opposite to Rh. Councilor Pillai, Miri-Tinjar Road

24 Sandy alternation of the Lambir Formation. Locality: Km 190.5, Miri-Bintulu Road

25 Shaly alternation of the Sibuti Formation. Locality: Km 146.5, Miri-Bintulu Road

26 Bounded shale of the Sibuti Formation. Locality: Km 127, Miri-Bintulu Road. Locality: Km 1, North Suai Road

27 Route map of the type section of the Suai Formation faulted against the overlying the Sibuti Formation along Suai Road

28 Cross section and columnar section of the type section faulted against the overlying the Sibuti Formation along Suai Road

29 Massive sandstone interbedded with shaly alternation in the Suai Formation. Locality: Km 1, North Suai Road

30 Brecciated mudstone of the Suai Formation. Locality: Km 1, North Suai Road

31 Route map (A), cross section (B) and columnar section (C) of the reference section, of the Suai Formation along Bukit Lembong Road

32 Route map of the type section of the Sibuti Formation along Miri-Tinjar Road

33 Cross section and columnar section of the type section, Sibuti Formation along Miri-Tinjar Road

34 Upper boundary stratotype of bounded shale of the Sibuti Formation is conformably overlain by sandy alternation of the Lambir Formation. Locality: Km 174.5, Bintulu-Miri Road

35 Subis Limestone Member of the Sibuti Formation. Locality: Batu Niah Town

36 Route map of the reference section of the Sibuti
Formation along Niah Road

37 Cross section and columnar section of the reference section of the Sibuti Formation along Niah Road

38 Route map (A), cross section (B) and columnar section (C) of the reference section, Sibuti Formation along Ladang 3 Road

39 Lithological map of the Gunung Subis area, Subis Limestone Member, the Sibuti Formation

40 Interfingering boundary between the Subis Limestone Member and the bounded shale, both of the Sibuti Formation. Locality: Geragok Quarry

41 Massive sandstone, Lambir Formation. Locality: Bukit Song, Km 186, Miri-Bintulu Road

42 Development of isolated biothermal limestone of the Subis Limestone Member, Sibuti Formation.

43 Route map of the type section of the Lambir Formation along Bintulu-Miri Road

44 Cross section and columnar section of the type section, of the Lambir Formation along Bintulu-Miri Road

45 Fault contact between Lambir and Sibuti Formation. Locality: Sg. Bakas, Miri-Tinjar Road

46 Gramunar Fault Zone. Locality: Km 9.8 west Bakong Town along Miri-Tinjar Road

47 Route map of the reference section of the Lambir Formation along Miri-Tinjar Road

48 Cross section and columnar section of the reference section of the Lambir Formation along Miri-Tinjar Road

49 Route map, cross section and columnar section of the type section of the Miri Formation along New Hospital Road

50 Sandy alternation of the Miri Formation, Locality: Station 9, New Hospital Road

51 Bounded shale of the Miri Formation. Locality: Station 15, New Hospital Road

52 Well Number 1. Locality: Canada Hill

53 Sandy alternation of Miri Formation. Locality: Miri Hill

54 Route map, cross section and columnar section of the reference section, of the Miri Formation along Bintulu-Miri Road at Miri Hill

55 Geological map of Miri-Tinjar Road, North Sarawak (after Banda, 1994)

56 Sample localities of the planktic foraminiferal analysis in the Sibuti area
57 Sample localities of the planktic foraminiferal analysis in NW Sarawak

58 Sample localities of the planktic foraminiferal analysis in the Suai and Sibuti Formations, along Suai Road

59 Sample localities of the planktic foraminiferal analysis in the cross and columnar sections of the Suai and Sibuti Formations, along Suai Road

60 Sample localities of the planktic foraminiferal analysis in the Suai Formation, along Bukit Lembong Road

61 Sample localities in the Sibuti Formation, along Miri-Tinjar Road

62 Sample localities in the cross section and total column of the Sibuti Formation, along Miri-Tinjar Road

63 Sample localities in the Sibuti Formation, along Niah Road

64 Sample localities in the Sibuti Formation, along Niah Road

65 Sample localities in the cross section and total column of the Sibuti Formation, along Ladang 3 Road

66 Sample localities in the Sibuti outcrop section, Bekenu Junction, Miri-Bintulu Road

67 Sample localities in the Entulang outcrop section, Km 37th, Miri-Bintulu Road

68 Sample localities in the Sekaloh outcrop section, Km 68th, Miri-Bintulu Road

69 Sample localities in the Subis outcrop section, Geragok Quarry

70 Sample localities in the Lambir Formation, along Miri-Bintulu Road

71 Sample localities in the cross section and total column of the Lambir Formation, along Bintulu-Miri Road

72 Sample localities in the Lambir Formation, along Miri-Tinjar Road

73 Sample localities in the cross section and total column of the Lambir Formation, along Miri-Tinjar Road

74 Sample localities in the cross section and total column of the_Miri Formation, along New Hospital Road

75 Occurrences of the planktic foraminifers in the samples from the Northwest Borneo Basin

76 Occurrences of the planktic foraminifers in the samples in the total column of lithostratigraphic units of the Northwest Borneo Basin

77 Index species range chart after Blow (1969) and
78 Correlation of planktic foraminiferal zonation of the Northwest Borneo Basin with those of Bolli (1957, 1966) and Blow (1969) 101

79 Correlation of planktic foraminiferal zonation and the paleobathymetric changes in the Northwest Borneo Basin 109

80 Schematic outline of the NW Borneo environment units (after Ho, 1978) 110

81 Distribution of sedimentary structures in the total column of the formations in the Northwest Borneo Basin 112

82 Log section of the Suai Formation at the North Suai Road Junction, Bintulu-Miri Road (A) and at BLD Quarry (B) 113

83 Cross lamination in thick sandstone bed of the Suai Formation. Locality: Km 103, Bintulu-Miri Road 114

84 Parallel bedding in thick sandstone bed of the Suai Formation. Locality: North Suai Road Junction 115

85 Cross bedding in thick sandstone bed of the Suai Formation. Locality: Km 103, Bintulu-Miri Road 115

86 Ripple marks in sandstone bed of the Suai Formation. Locality: Km 103, Bintulu-Miri Road 115

87 Log section of the Sibuti Formation at Km 2, Lamaus Road (A) and at Km 1st, Niah Road (B) 116

88 Mudstone interbedded with limestone in the Suai Formation. Locality: BLD Quarry, North Suai Road 117

89 Slump structures of the bounded shale sequences in the Sibuti Formation. Locality: Km 2, Batu Niah Road 117

90 Ichnogenus Orphiomorpha sp. in the bioturbated sandstone of the Sibuti Formation. Locality: Km 106, Bintulu-Miri 118

91 Cut and fill structures (channeling) in the alternation of shale and sandstone of the Sibuti Formation. Locality: About 2 Km from the junction of Fung Tai Quarry Road, Bintulu-Miri Road 118

92 Bounded shale in the upper part of the Sibuti Formation, Locality: Km 70.5 Bintulu-Miri Road 119

93 Log section of the deltaic sediments at Bukit Song, the Lambir Formation (A) and at Miri Hill, the Miri Formation (B) 120

94 Cross-beded sandstone beds of the Lambir Formation overlying the bounded shale of the Sibuti Formation. Locality: Entulang outcrop section, Km 37, Bintulu-Miri Road 121

95 Soft sediment deformation in cross-beded sandstone of the Lambir Formation. Locality: Entulang outcrop section,
Km 37, Bintulu-Miri Road 122

96 Trough cross bedding sandstone of the Lambir Formation.  
   Locality: Entulong outcrop section, Km 37, Bintulu-Miri Road 122

97 Bioturbated, laminated sandstone of the Lambir  
   Formation. Locality: Km 22, Bintulu-Miri Road 123

98 Gravel deposit in a channelised sandstone of the  
   Lambir Formation. Locality: Km 22, Bintulu-Miri Road 123

99 Large scale cut and fill structure (truncation) in the  
   sandstone of the Lambir Formation. Locality: Bukit  
   Song, Bintulu-Miri Road 124

100 Trough cross bedding sandstone of the Miri Formation.  
    Locality: Miri Hill, Bintulu-Miri Road 124

101 Cut and fill structures (channeling) in mudstone of the  
    Miri Formation. Locality: Miri New Hospital Road 126

102 Herring bone cross bedding sandstone of the Miri  
    Formation. Locality: Miri Hill, Bintulu-Miri Road 126

103 Depositional environment during the early Early Miocene  
    (Top of Cycle I) in Northwest Borneo Basin 127

104 Depositional environment during the mid Early Miocene  
    (Top of Cycle II) in Northwest Borneo Basin 129

105 Depositional environment during the early Mid Miocene  
    (Top of Cycle III) in Northwest Borneo Basin 130

106 Depositional environment during the Mid Miocene  
    (Top of Cycle IV) in Northwest Borneo Basin 132

107 Geotectonic map of Borneo and the surrounding region of  
    Southeast Asia during Early Miocene 133

108 Geotectonic map of Borneo and the surrounding region of  
    Southeast Asia during Middle Miocene 134

109 Regional folding during Late Eocene and Late Miocene- 
    Pliocene in Sarawak 135
