

Acknowledgments

To begin with, I would like to thank my supervisors, Prof. Shin'ichi Yuta, Prof. Akihisa Ohya and Prof. Lindsay Kleeman. I am really happy with you were my supervisors. With respect to conclude this thesis, I would like to thank Prof. Keinosuke Nagai, Prof. Yuichi Ohta and Prof. Kazuo Tanie for their helpful comments.

I would also like to thank current and former members of the Intelligent Robot Laboratory at the University of Tsukuba, Japan, for their kind help and their effort to make it a fun place, and the Intelligent Robotics Research Centre at Monash University, Australia, for their assistance during my stay for three months. And also, professors of the Department of Engineering Systems at the University of Tsukuba are acknowledged for giving me foundations to do the research since undergraduate course.

I did not think I could finish this doctoral program when I started. I owe this result entirely to help of the people listed above, many other researchers who gave me technical advice and friends who cheered me up. Thank you so much.

Finally, I want to say "go-rikai to go-shien wo itadaki, hontou ni arigatou-gozaïmashita." to my parents and dog.

Publications list

Journal Articles (Fullpaper reviewed)

1. Teruko YATA, Akihisa OHYA, Shin'ichi YUTA,
"A Fast and Accurate Reflecting Points Measurable Sonar-Ring System (in Japanese),"
The Journal of the Robotics Society of Japan,
Vol.17, No.8, pp.1173 - 1182, 1999.
2. Teruko YATA, Lindsay KLEEMAN, Shin'ichi YUTA,
"Fast Bearing Measurement with a Single Ultrasonic Transducer,"
The International Journal of Robotics Research,
Vol.17, No.11, pp.1202 - 1213, 1998. Sage Publications.
3. Teruko YATA, Shin'ichi YUTA,
"Measurement of Reflecting Direction from the Center Frequency of the Echo in Ultrasonic Sensing,"
The International Journal of the Robotics Society of Japan - Advanced Robotics,
Vol.11, No.3, pp.269 - 284, 1997. VSP.

International Conference Proceedings (Fullpaper reviewed)

1. Teruko YATA, Akihisa OHYA, Shin'ichi YUTA,
"Fusion of Omni-directional Sonar and Omni-directional Vision for Environment Recognition of Mobile Robots"
To appear: 2000 IEEE International Conference on Robotics and Automation.
2. Teruko YATA, Akihisa OHYA, Shin'ichi YUTA,
"A Fast and Accurate Sonar-Ring Sensor for a Mobile Robot"
1999 IEEE International Conference on Robotics and Automation.
pp.630 - 636, Detroit Michigan, May 1999. (The Best Student Paper Award)
3. Teruko YATA, Lindsay KLEEMAN, Shin'ichi YUTA,
"Wall Following Using Angle Information Measured by a Single Ultrasonic Transducer"
1998 IEEE International Conference on Robotics and Automation.
pp.1590-1596, Leuven Belgium, May 1998.

4. Teruko YATA, Akihisa OHYA, Shin'ichi YUTA,
"Indoor Environment Recognition for a Mobile Robot Using Ultrasonic Sensors
- Measuring the Direction and Distance of Multiple Object -"
Robotic and Manufacturing Systems - Recent Results in Research, Development, and Applications.
Vol.3, pp.803 - 808, Montpellier France, May, 1996.

Domestic Conference Presentation

1. T.YATA, A.OHYA and S.YUTA,
"Environment Recognition for a Mobile Robot by Ultrasound
- An Environment Map Generation by a Fast and Accurate Sonar-ring Sensor - (in Japanese)",
Proceedings of the 1999 Autumn ASJ meeting,
pp.1197-1198, Shimane Japan, September 1999.
2. T.YATA, A.OHYA and S.YUTA,
"Possibility of Detecting Shape of a Reflecting Object
- a mobile robot sonar ring sensor system measuring the bearing angle to the reflecting points:
the 6th rep.- (in Japanese)",
Proceedings of the 17th RSJ conference,
pp.43-44, Kanagawa Japan, September 1999.
3. T.YATA, A.OHYA and S.YUTA,
"Occlusion in Ultrasonic Sensing
- undetectable area of multiple objects detecting pulse-echo ultrasonic sensor- (in Japanese)",
Proceedings of the 17th RSJ conference,
pp.41-42, Kanagawa Japan, September 1999.
4. T.YATA, A.OHYA and S.YUTA,
"A 30ch 1bit Ultrasonic Echo Wave Memory System for Detecting Multiple Objects
- a mobile robot sonar ring sensor system measuring the bearing angle to the reflecting points:
the 5th rep.- (in Japanese)",
Proceedings of the 16th RSJ conference,
pp.915-916, Hokkaido Japan, September 1998.
5. T.YATA, A.OHYA and S.YUTA,
"A Mobile Robot Sonar Ring Sensor Measuring the Bearing Angle to the Reflecting Points
(in Japanese)",
Proceedings of ROBOMECH'98,
2CIII5-6, Sendai Japan, June 1998.
6. T.YATA, L.KLEEMAN and S.YUTA,
"Measurement of the Bearing Angle to the Reflecting Point with a Single Ultrasonic Transducer
(in Japanese)",
Proceedings of the 15th RSJ conference,
pp.187-188, Tokyo Japan, September 1997.

7. T.YATA, A.OHYA and S.YUTA,
"Simultaneous Measurement of the Bearing Angle to the Reflecting Point with a Mobile Robot Sonar Ring Sensor (in Japanese)",
Proceedings of the 15th RSJ conference,
pp.189-190, Tokyo Japan, September 1997.
8. T.YATA and S.YUTA,
"A Sonar Ring Sensor for a Mobile Robot With Simultaneous Transmission and Receive to measure the Direction of the Object (in Japanese)",
Proceedings of the 14th RSJ conference,
pp.515-516, Nigata Japan, November 1996.
9. T.YATA, A.OHYA and S.YUTA,
"Simultaneous Measurement of Multiple Object Positions Using Multiple Ultrasonic Receivers (in Japanese)",
Proceedings of the 13th RSJ conference,
pp.967-968, Tokyo Japan, November 1995.
