Examining the relationship among students’ physical activity level, students’ learning behaviors, and students’ formative class evaluation during elementary school physical education classes

DISSERTATION

Presented in Partial Fulfillment of the Requirements for
The Degree Doctor of Philosophy in Doctoral Program of Health and Sport Sciences of
University of Tsukuba

FIELD OF STUDY

Major Field: Sport Pedagogy
Advisor: Dr. Takeo TAKAHASHI
ACKNOWLEDGEMENTS

First I would like to express my sincere gratitude to my academic advisor, Professor Takeo TAKAHASHI for his untiring encouragement and guidance from the beginning of my study in University of Tsukuba. With his recommendation, I have opportunity to be doctoral Monbukagakusho scholarship student in University of Tsukuba.

I would like to thank also to Associate Professor Yoshinori OKADE, Professor Kaoru TAKAMATSU, Professor Kunijirou ARAI, member of my dissertation committee, for their invaluable comments.

I owe thank also to Professor Etsushi HASEGAWA, Professor Hiromi MIKI, and all of Sport Pedagogy Lab Family Members for their assistance and advice so that I could finish my study.

To all of those who help with data collection I owe a special thanks. Surely, without their help this study would not have been possible: Yoshihiko FUKUGASAKO, Kohei YONEMURA, and Takeshi YOSINAGA.

All the teachers and their students who volunteered as subject in this study are owed many thanks.

I would like to thank also to Satoshi KOMATSUZAKI and Tomoyashu KONDOU for tutoring me so that I could prepare for entrance test, follow required courses, and conducting some researches in Doctoral Program in Health and Sport Sciences, Institute of Health and Sport Sciences, University of Tsukuba.

Finally, my special thanks loves are doe to my faithful wife SUCIATI for her encouragement, prayers, and patience during my study in Japan. I owe my entire education to my mothers (LASMIRAH & MISNAH), my father (DAWUD) for their continuing prayers and hopes for success of my education.

## Chapter

1. **INTRODUCTION** ............................................. 1
   1.1. Statement of the problem 4
   1.2. Assumptions of the study 5
   1.3. Limitations of the study 6
   1.4. Definition of special terms 6
   1.5. Summary 8

2. **REVIEW OF RELATED LITERATURE** ....................... 9
   2.1. Current worldwide problems in children 9
   2.2. Children’s physical activity 10
   2.3. The role of PE classes for children 13
   2.4. Characteristic of effective/good PE classes 13
   2.5. Improving quality of PE classes 18
   2.6. Summary 20
3. RELATIONSHIPS AMONG STUDENTS’ FORMATIVE CLASS EVALUATION (FCE) SCORE, STUDENTS’ LEARNING BEHAVIORS (LB), AND STUDENTS’ ENGAGEMENT IN MODERATE TO VIGOROUS PHYSICAL ACTIVITY LEVEL (MV-PAL) ................

3.1. Purposes .......................... 21
3.2. Methods .......................... 21
3.2.1. Subjects ......................... 21
3.2.2. Observation of learning behavior (LB) in PE classes 22
3.2.3. Measurement of Students’ formative class evaluation (FCE) 23
3.2.4. Observation of physical activity level (PAL) in PE classes 24
3.2.5. Reliability of data ............... 25
3.3. Results ........................... 25
3.3.1. Students’ formative class evaluation (FCE) scores 25
3.3.2. Students’ physical activity level (PAL) ......................... 26
3.3.3. Students’ learning behavior (LB) .................. 28
3.3.4. Relationship between students’ learning behavior (LB) during A2 episode and students’ formative class evaluation (FCE) score toward their PE classes 29
3.3.5. Relationship between proportion of students’ learning behavior (LB) and proportion of students’ engagement in MV-PAL 30
3.3.6. Relationship between students’ engagement in MV-PAL and students’ FCE score toward their PE classes 31
3.4. Discussion ......................... 33
3.5. Conclusion and recommendations 36
4. STUDENTS' PHYSICAL ACTIVITY LEVEL (PAL), AND STUDENTS’ FORMATIVE CLASS EVALUATION (FCE) DURING AEROBIC AND NON-AEROBIC UNITS OF ELEMENTARY SCHOOL PHYSICAL EDUCATION (ES-PE) CLASSES ........................................

4.1. Purposes .......................................................................................................................... 38
4.2. Methods ............................................................................................................................ 38
4.2.1. Subjects .......................................................................................................................... 38
4.2.2. Observation of students’ MV-PAL ................................................................................. 39
4.2.3. Measurement of students’ physical activity level (PAL) using pedometer .......... 39
4.2.4. Measurement of students’ formative class evaluation (FCE) score ....................... 40
4.2.5. Reliability of data ........................................................................................................ 40
4.3. Results ............................................................................................................................... 40
4.3.1. Comparison on purpose of aerobic and non-aerobic units ..................................... 40
4.3.2. Comparison on pattern of teacher’s activities .......................................................... 42
4.3.3. Comparison on proportion of each lesson’s context categories ............................... 43
4.3.4. Comparison on the average of students’ MV-PAL engagement ............................. 44
4.3.5. Comparison on number of students’ step ................................................................... 45
4.3.6. Comparison on average intensity of PA ...................................................................... 46
4.3.7. Comparison on proportion of students’ LB ................................................................. 46
4.3.8. Comparison on the average of students’ FCE .............................................................. 47
4.3.9. Relationships among variable PAL, LB, and FCE ..................................................... 48
4.4. Discussion .......................................................................................................................... 49
4.5. Conclusion and recommendations .................................................................................. 52
5. STUDENTS' PHYSICAL ACTIVITY LEVEL (PAL), STUDENTS' LEARNING BEHAVIOR (LB), AND STUDENTS' FORMATIVE CLASS EVALUATION (FCE) DURING GYMNASTICS UNIT OF ELEMENTARY SCHOOL PHYSICAL EDUCATION (EL-PE) CLASSES FOR 2\textsuperscript{nd} AND 3\textsuperscript{rd} GRADERS .................................................................

5.1. Purpose 55
5.2. Methods 55
5.2.1. Subjects 55
5.2.2. Observation of students' moderate to vigorous physical activity level (MV-PAL) 56
5.2.3. Measurement of students' physical activity level (PAL) using pedometer 56
5.2.4. Measurement of students' formative class evaluation (FCE) 57
5.2.5. Measurement of students' learning behaviors (LB) 57
5.2.6. Reliability of data 58
5.2.7. Data analysis 58
5.3. Results 58
5.3.1. Proportion of each lesson's context categories 58
5.3.2. Proportion of maximum involvement rate (MIR) 60
5.3.3. Students' PAL 61
5.3.3.1. Number of students' steps 61
5.3.3.2. Intensity of students' PA 62
5.3.4. Proportion of A2 episodes used by students to engage in MV-PAL 63
5.3.5. Students' formative class evaluation (FCE) scores 64
5.3.5.1. Class average of students' FCE scores 64
5.3.5.2. Sample average of students’ FCE scores 66
5.3.6. Students’ learning behavior (LB) during A2 episodes 67
5.3.7. Relationship among variables (PAL, LB, FCE) 68
5.3.7.1. Relationships between students’ formative class evaluation (FCE) and students’ physical activity level (PAL) 68
5.3.7.2. Relationships between students’ formative class evaluation (FCE) and students’ learning behavior (LB) 70
5.3.7.3. Relationships between students’ learning behavior (LB) and students’ physical activity level (PAL) 70
5.4. Discussion 71
5.5. Conclusion 73

6. SUMMATION OF THE STUDY ................................................. 75
6.1. A review of the study 75
6.2. Results 84
6.3. Conclusion 90
6.4. Recommendation for further study 92

BIBLIOGRAPHY ............................................................................. 94
Appendix 4-1 T-test of lesson context, FCE, PAL, and LB between aerobics and non-aerobics unit (N=14 classes) ..................................................... 54
Appendix 4-2 Pearson correlation between FCE and PAL ......................... 54
Appendix 4-3 Pearson correlation between FCE and MV-PAL ................... 54
Appendix 4-4 Pearson correlation between FCE and LB ............................ 54
Appendix 4-5 Pearson correlation between PAL and LB ............................ 54
