はじめに

2021年1月現在、東海大学政治経済学部政治学科辻中豊研究室では、日本学術振興会科学研究費基盤研究A「日本とアジアの市民社会と都市ガバナンスの比較実証・公共政策研究」(20H00064、2020年度から2024年度、辻中豊代表)ならびに東海大学総合研究機構「QOL向上のための、日本とアジアにおける都市ガバナンスモデルの構築」(出雲明子代表、2019年度から2021年度)の2つの研究資金を基に、日本とアジアの都市ガバナンスと市民社会の比較研究を遂行している。

現在の調査研究は、辻中豊を中心として、1997年以降、継続して行われてきた「団体の基礎構造に関する研究会」の広義のJIGS研究(Japan Interest Group Study, 市民社会を広く視野に収める現在ではCross-national Survey on Civil Society Organizations and Interest Groups in Japan)を継続し発展させたものである。JIGS調査研究では、これまで15か国、日本全国で100以上、世界各国でも100以上の都市・地域をカバーして、7万以上の市民社会組織(各種団体、NGO/NPO、近隣住民組織)の個票データ、その他住民意識調査を含め総計9万近くの個票データを収集している¹。

2020年度には、こうした20年以上にわたって収集されてきた個票データを、都市ガバナンス分析に適用すべく、データの再チェックと整備が行っているところである。

タイにおける市民社会組織調査は、JIGS調査研究の一環として、住民組織(NHA=NC)調査を2012年3月から5月、その他の市民社会の社会団体調査を2013年3月から8月に実施した。調査実施担当者は、コンジット・シャラムポン氏²であり、同氏はこのデータをもとに博士論文を執筆し、2017年に筑波大学から博士の学位³をえている。

タイに関しては、その後、辻中豊とコンジットによってフォローアップ実査調査が行われ、また2018年4月には、住民意識調査(Web調査、対象400)が行われている⁴。

本コードブックは、2012年と13年に実施された両調査を、2020年度の研究としてデータを再精査し確定することによって、コードブックとして取りまとめたもののうち、自治会編(第一次 団体の基礎構造に関する調査(タイ・自治会NHA/NC調査TH-JIGS1-NHA))のコードブックである。制作を担当した研究者は、李俊九氏(東海大学臨時職員、筑波大学大学院、博士後期課程 人文社会科学研究科)である。

Overview

Overview and Methodology

Chalermpon KONGJIT with Yutaka TSUJINAKA

Use of Survey Method

The survey conducted for the present research¹ focuses on two different categories that represent civil society organizations. The first follows the cross-national survey on civil organizations (known as JIGS Project, JIGS1 in 1997 to JIGS4 in 2017), funded by the Japanese Ministry of Education, Culture, Sports, Science, and Technology (MEXT) and Japan Society for the Promotion of Science (JSPS), which funded similar types of surveys in other 14 countries². The other survey is derived from the national survey of neighborhood associations of Japan, which was carried out in 2006 and 2017 (JIGS2-NHA and JIGS4-NHA).

Purpose of the Surveys

The surveys were conducted to explore the following points regarding civil society in Thailand.

- Basic information about legal status, purpose, membership, finance, and sphere of activities.
- Relationships with the administration (local and national), other political entities (legislatures, courts, and political parties) and among civil society organizations.
- Interest in policies issues, and involvement in policy making.

¹ Please refer to the following dissertation as the treatise that analyzed this survey. Chalermpon KONGJIT, *Civil Society in Thailand: Strengthened by Municipality with Partisan Politics*, 5,31, 2017

info: doi/10.15068/00149902, stored in the Tsukuba Repository (University of Tsukuba Library, <https://tsukuba.repo.nii.ac.jp/>).

² 14 countries include Japan, Korea, USA, Germany, China, Turkey, Russia, the Philippines, Brazil, Bangladesh, Poland, Estonia, Uzbekistan and India (1997-2014). All codebook and survey reports related to the JIGS surveys including NHA surveys are stored in the Tsukuba Repository (University of Tsukuba Library, <https://tsukuba.repo.nii.ac.jp/>) under the index of Yutaka TSUJINAKA. They can be downloaded as PDFs.

Table 1: Survey conducted in Thailand

The NHA (NC) survey

Table 1 shows the survey conducted in Thailand NHA survey (2011-2012). The population size of neighborhood communities (NCs) was 156 and the sample distribution of 4 areas were shown there. The valid response was 142 NCs (91.0%). All population data sources were obtained from the name list of the Municipality Office. NCs had been established with the Ministry of Interior designated terms and registered by Municipality Office with aiming to encourage and support to gather local group of residents to facilitate more efficiency and effectiveness in providing social services and participation in their community. By classification they are:

1. 133 NCs had been registered as City level (Tessaban Nakorn in Thai, see the explanation next page as for the level). There are 90 NCs in Chiang Mai Municipality and 43 NCs are in Lampang Municipality.
2. 23 NCs had been registered as Town level (Tessaban Muang). There are 17 NCs in Lamphun Municipality and 6 in Mar Hong Son Municipality.

Neighborhood community (NC) is perceived as a part of the strength of state's creation of the civil society organizations. This group refers to one type of Thailand neighborhood resident groups that the Ministry of Interior has issued an order to the municipality to encourage, organize and recognize them to conform with the 1997 constitution. NC is designated as a specific block or zone by the local government, in the municipality and sanitary district, called in Thai "Chumchon Yoi Naikhet Tessaban". Becoming membership is voluntary based. Local residents who live together in particular geographically delimited area can be its member. It covers all single-detached dwellings, condominiums, including all crowded community, slum area, housing estate place and the like.

Dual Local Administration Structure by Central and Local Government

According to the territory-based administration structure in Thailand, the local administrative system managed by national (Central) government comprises provinces (76) and districts (878) levels. Each province could be generally divided into districts level (towns) accompanying with a local capital district (big city) by territorial. Compared to other administration, the distinctive feature of capital district has no subdivision level after the district in local administrative system, which is different from the other districts where they have subdistricts (7,255) and villages (74,965).

As an alternative local autonomy administration, there is a form of municipality (in total, 2,441 including 30 city municipalities, 178 town municipalities and 2,233 subdistrict municipalities) as local government where the mayor and council representatives are elected by the people. In the same way, the heads of the national capital (Bangkok Metropolitan Administration) as well as Provincial Administrative Organizations (76) in the provinces are respectively elected by the people.

There are three level of the municipality that are based on the population size and its budgetary income in Thailand. The population of city level (Tessaban Nakorn, 30 City Municipalities) are at least 50,000 residents while the town level (Tessaban Muang, 178 Town Municipalities) are at least 10,000 residents. Both levels usually locate around the provincial capital district but depend on the basis of

geographical size of administration, density of populations and budgetary incomes. On the other hand, the township level (Tessaban Tambon, 2,233 Subdistrict Municipalities) is as the lowest level unit of the municipality where they consist of 5,000 populations and may extend over parts more than one subdistrict.

The local autonomy administration consists of Mayor and the councils, which differentiate from the local administration by the national government. However, the municipality does not have a high degree of autonomy in dealing with local affairs because most of administrative officials and staff are appointed centrally by a commission attached to the Ministry of Interior of Thailand.

Chiang Mai Province

The survey method had been done by both mail and direct interview with the president. The valid responses that were derived are as follows, Chiang Mai (84.4%), Mae Hong Son (100%), Lampang (100%) and Lamphun (100%).

Chiang Mai province is central city located in the Northern part of Thailand. Its population size is around 1.8 million people (2018), the 5th largest in this country. It is a blend of rural and urban characteristics. Chiang Mai locals have lived in the formation of traditional communities with high native identity and have strong social relations among them.

On the other side, Chiang Mai has been selected by the Town and Country Planning Department of the Ministry of Interior to be given top priority in development as a primary city in the northern regional center to develop. It is expected to provide decentralization model of industrial growth and economic and commercial activities from Bangkok Metropolitan Area as one of the urban centers in other regions. Consequently, in the city of Chiang Mai, there is the growth of urban areas and high productivity level with the concomitant migration of rural people. Moreover, Chiang Mai become the center of upper northern Thailand for education, industries, investment, urbanization and important administrative agencies. These reasons supported to be the main study area for conducting the present survey towards civil society organization from local governance perspective.

The CSO survey

In the CSO survey (2012-2013) in this area, the population size of sampling were 2,996 organizations. The total valid response was 376 (12.6%). For the survey, non-profit and non-government organizations enlisted by the ministry office has been regarded as the targeted population. They were Cooperatives, NGOs, Youth Groups, Professional Groups, Labor Unions and others

Voluntary Social Organizations. However, full statistics of all these organizations are not available in one directory. Therefore, all data sources were obtained from the name list of Organization of the Department of Provincial and of the Municipality offices and we had also searched the website of Ministry of Social Development and Human Security and other Organization Directory to complement.

The survey had been done mainly by mail and reconfirmed for some organizations by phone. The valid response breakdown in each area was Chiang Mai (12%), Mae Hong Son (29.91%), Lampang (5.4%), Lamphun (20.7%), respectively.

Data Collection Period

The collected data had been processed using descriptive statistics analysis which provides a wide range of information on civil society organization related to their nature of characteristics and relation with the government. Moreover, by the local researcher the participatory observation and informal interviews were conducted with resource persons such as civil society leaders and government administrators concerning civil society in Thailand.

- The survey of Neighbor community for Northern Region 1 in Chiang Mai, Lamphun, Lampang and Mae Hong Son Province took place in March to May, 2012.
- The survey of Civil Society in Thailand for Northern Region 1 in Chiang Mai, Lamphun, Lampang and Mae Hong Son Province took place in March to August, 2013.
