

Table 2.5 Criteria for tangible effects evaluation in Deming Prize recipient company (178 recipients 1950 – 1999)

order	Tangible effects	Use	1	2	3	4	5	6	7	8	9	10
1	Managerial aspect	1 Growth rate	Sales	Export amount	Sales growth rate	Profit before tax (amount / rate)	Profit after tax (amount / rate)	Return on assets	Recurring profit per employee	Net profit	Capital turnover	
		2 Profitability rate	Recurring profit (amount / rate)	Profit	Break-even point ratio	Profit (amount / rate)	Profit (amount / rate)	Break-even point				
		3 Productivity	Added value productivity	Sales per employee	Added value productivity per employee	Labor productivity	Equipment investment	Break-even point operation capacity				
		4 Stability	Owned capital ratio	Loan dependency (ratio)	Sales and financial cost ratio							
2	Managerial element	1 In-process defects and process control	Process defective rate	Cost of defects	Process defective rate per machine	Yield	Product standard revision number	Product quality evaluation	Direct rate			
		2 Final product inspection	Acceptance rate of inspection by QA Dept.	Shipment inspection passing rate								
		3 User demerit decrease	Complaint (cost, rate, no. of cases)	Defective rate of incoming inspection of customer delivery	Returned products rate	Compensation with international level	Customer line complaint rate	Customer line complaint (cost, rate, no. of cases)	Market complaint	Annual failure rate	Recall number	
		4 User merit increase	Market quality evaluation comparison	User satisfaction rating	Comparison with international level	Quality issue content transition	Customer cost reduction	Extension at guarantee period				
		5 Market competition	Market-share	No. of important quality issue solution	Nuclear power use rate	Corporate image	Quality domination evaluation					
3	Divisional activities	1 Cost Reduction	Cost reduction amount	Rate of defect cost	New product mass production start up cost	Improvement of standard physical unit	Target cost achievement situation					
		2 Rationalization	Amount of rationalization	Improvement of delivery price	Effect of saving resource energy conservation	Equipment improvement number						
		1 Production rate	Production quantity	Production per employee (machine)	Amount of in-process product	Equipment utilization rate						
4	General	2 Inventory	Stock turnover rate	Inventory turnover	No. of stock holding days (month)	Stock reduction	Delivery trouble (no. of cases and rate)					
		3 Delivery date	Delivery date achievement rate	Late delivery (no. of cases and rate)	Out-of-stock rate	Lead time						
		1 Safety /environment	No. of accidents	Accident rate	Severity rate	Poisonous gas discharge rate	Amount of toxic waste	Amount of toxic waste	Non-recycling rate			
5	Remarks	1 Human resources development	No. of completed QC Circle themes	No. of suggestion	Number of qualification acquisition	Attendance rate	No. of employee receiving education	Use of SQC technique	Improvement of raise rate	Fixing rate	Improvement activity level evaluation point	Own house no. and public welfare satisfaction rate
		1 Social contribution	No. of exchange events with region	No. of foreigner trainee receipts	No. of volunteer work blood donors							
		1 Development capability	New product sales (amount and ratio)	Patent application number	Number of new products	New product development period	Design change number	Design change number	Enlargement of product lineup	Possession technology	Technological level self-evaluation	
6	Remarks	2 Marketing capability	Order amount	Achievement rate of Sales plan	Expectation constraint	Consal number						
		3 Informationization	Economic outside and in-house effect	Competita information total number	Monthly average frequency of use of the E-mail	E-mail volume of information	Monthly closing days of accounts	Use number to designs of complaint	LAN use system number	Number of registration of LAN of slit format	Computer operating time of year	
		1 Self-evaluation point	Self-evaluation in business structure	Innovation activity level evaluation point	President QC diagnosis evaluation	Policy Management evaluation point	TGM promotion evaluation point	Level evaluation according to ISO item	Function image of independent enterprise

Remarks	*This name is S-M Prize, abolished and has been integrated into the Application Prize now. Moreover, the Japan Quality Control Medal is established, and applicant qualification is generated in the Deming Prize received later for five years. And, because each prize is fiscal year prize, multi time application is possible.										

Table 3.5 Japan Quality Award recipients table

Annual	Company name	Receiving reason
1996	NEC semiconductor group	An excellent evaluation and a high achievement are obtained with prompt and precise response to the market trend by excellent corporate principles and foresight in the business field where technical innovation is violent, and risk require enormous amount investment.
1997	Asahi Breweries, Ltd.	The improvement of the evaluation and the achievement in the market are obtained steadily by adequate grasp of customer needs and prompt response to it in the beer industry where is a big change depending on diversification of preference of the consumers, change of marketing system according to deregulation, and new competing factor by import beers and low-malt beer etc.
	Golf club of Isumi Chiba	Corporate principles of "Enterprise making that is loved and trusted by all people who surround the enterprise" infiltrate even every corner of the daily business in strong leadership of top, under difficult environment with burst of economic bubble and mature stage of golf industry, poor conditions of location is overcome by Customer Service, and it relates to the expansion of the share, the improvement and of the customer's evaluation and the improvements of a financial results.
1998	The Japan Research Institute, Ltd.	The paradigm of the autonomous self-conclusion type management is advocated by creativity, autonomy, and cross-organizational corporation focusing to customer and market needs, and enterprise additional value, it executes voluntarily and concludes successfully. It can be said that the model of a new management will still be presented to the industrial world that doesn't see the symptom slipping out confusion.
	Yoshida original	It challenges "Wall of the wholesale store circulation structure" in the forehead that becomes a problem for the customer value creation in the bag industry, in the forehead to pursue thoroughly the customer needs that truly understand "Goodness of original goods that make the best use of leather original peculiar characteristic", the project, production, and sales is integrated and high customer satisfaction measurement, customer retention rate, and superior achievement are achieved.
1999	Ricoh	The corporate principles "We aim at the trust and charming world company of by inventing and offering world useful and new value in relations of person with information" be hung in depression of Asian economy must spread all over the world and business risk by the exchange change, and the very high customer satisfaction degree and share in the industry are secured, and the continuous increase of income and profit in five terms has been accomplished by advocating "Image Communication" as enterprise slogan, and devoting "CS Management".
	Fuji Xerox the first center sales part	It aims at revolution of the document solution business related to efficiency of customer's business and a high value creation from the rental and maintenance business of copy machine that makes the major company in Japan a customer. It works on a lot of revolutions aiming at the first class solution provider that understand customers and can created best document solution with customer from the business model of setting hardware, and obtaining an advantage by use of supply goods and charge for maintenance.
2000	IBM Japan, General Business Division (GBD)	It gives priority to the improvement of the customer satisfaction rating for the agile management realization requested in the age which technical innovation is violent, and the strategy original "Improvement of the productivity of an existing business" and "Great shift to a new business" under strong leadership. The promotion of, the shares of management vision, the use of information technology (IT), special, high employee development, furthermore, the role that one sales person in charge of business has done deploy to the business that makes to the division of labor and is specialized in by division top management. A high customer satisfaction rating and the productivity improvement have been achieved at the same time as a result by constructing and driving through of in original GBD system in all companies system.
	Musashino	Original "Management by the management plan" and "Speed management by the information use" of a strong top leadership are practiced, a continuous management improvement that makes "Management quality improvement program" a tool is done, and a competition dominant system has been established in severe industry environment. Moreover, a series of activities "The working system is improved by customer's aspect, and tie to the improvement of business results" are widely deployed mainly "Eight team activities" to request the employee's independent participation with all companies, and functions to as a mechanism of promoting employee individual growth for corresponding flexibly to an environmental change that surrounds the business. It is one model of the success of the small and medium-sized enterprise management.
2001	Dai-ichi Mutual Life Insurance	A lucid strategy "Life Design" for the achievement of "Partner at the whole life" under original of corporate principles "The first contractor principle" since establishment and is consistently progressed. Each process of "Commodity and service development", "Sales, maintenance, and deep plowing", "Under writing", and "Asset management" demonstrates originality in the key process to achieve the strategy based on the customer satisfactory improvement. In addition, an excellent result is achieved in the life insurance industry under the contrary wind by thorough use of the information technology, the vital organization climate-making that centers on the conversation of manager and site staff, special, high staff development, and executing a continuous assessment. This respect can be admitted from an overseas ranking agency by even evaluating the promotion.
	Seiko Epson, Information Image Business Headquarters	The competitive management system is constructed as an inkjet printer domestic No.1 enterprise in violent changes of market environment. Especially, the high appraisal was obtained for "Taking the leadership-Setting an example" by topmanagement, demonstrating the leadership with speed feeling by the IBU system rearranged with the customer aspect, a continuous improvement in the competitive product planning process etc.
2002	Pioneer Mobile Entertainment Company	The industry-leading positionis built in the field of the car audio - car navigation by thorough customer focus. The activities that makes the environment can do open conversations with all parties concerned in the inside and outside of company including the customer, and creates high customer value with unites through the first technological pursuit in the world original under the spirit since establishment that keeps challenging the creation of an original commodity and new markets in the basis "Challenge to the pioneer departure and the first in the world" is widely executed over the management whole. It creates and proposes the product and service with new value to which the other companies is not permitted to follow in the car audio - car navigation field continuously as a result of such a approach, and the customer satisfaction rating and the achievement at the industry-leading level have been acquired.
	Calsonic Harrison	It demonstrates it in the revolution to "Global company of the strongest competitive edge" as part producing company of the car industry that changes suddenly, and it is possible to peel off, and a strong leadership is demonstrated by a top initiation in strengthening the organization power. Moreover, to strengthen competitive edge and the management foundation in the future, the mechanism of original management "Integrated production technology management" to answer customer, business partner, and employee's voices in sincerity is constructed. The climate in which it works on the management quality improvement activity at a top center in all companies is brewed to polish such its own originality, the talent promotion activity etc. related to a discussion and an improvement activity thorough of the top an
	Toyota Vista Kochi	In a severe car sales industry from which the decrease in the profitability because depression of a new car sales and Car cycle prolongments is not avoided after burst of the economic bubble, the mission "It challenges a new sales technique for not catching in an existing concept, and aim at highly effective sales and a highly effective management" since establishment is hung. In president's strong leadership, the system and activity that improves the employee's satisfaction are progressed as for "High customer satisfaction by the challenging workshop and the employee who thinks". Moreover, the business policy "The satisfaction rating of an existing customer is maximized" is assumed to do, and the various contact point activities with customer who made the best use of the strong point of one base to its maximum.. The result of such activities has been achieved the business result of top-level in dealer of Toyota group and high customer satisfaction.
2003	NEC Holding	In the support service business area of the IT industry with an extreme change, that a steady management is done while clarifying as directionality that should be advanced in the revolution to the service provider that creates new value, and constructing a management system necessary for its achievement in the balance, and the excellent customer satisfaction and business results of industry-leading level is have been acquired. Especially, a multipronged activities for the achievement of "Management based upon CS" had a strong contribution desire for original and the business of the effort of the creating environment that NEC was able to provide service without reserve, was executed steadily and continuously by supporting of alive living and working employee, and the high appraisal was obtained in the point to have strengthened mutual trust with the customer.

Table 4.2 Criteria comparison: Table of MBNQA, EGA, JQA, Deming Prize

Name	Criteria for Performance Excellence, MBNQA 2003	EFQM Excellence Model in 1999 EGA Criteria	JQA Criteria, 2001	2003 Deming Prize Application Guide
Purpose	Customer satisfaction, business excellence, and global competitiveness	Customer satisfaction, business excellence, and global competitiveness	Customer satisfaction and business excellence	Customer Satisfaction and Quality First
Explanation chart	Badridge Criteria for Performance Excellence Framework: A System Perspective	It divides "Enablers System" and "Result System" into Model Framework.	Criteria Framework	Examination Viewpoint, Relation and distribution point of Fundamentals of examination
Number of Criteria items	First: 7 items, 2nd: 21 items	First: 9 items, 2nd: 32 items	First: 8 items, 2nd: 23 items	Fundamentals: 1st 6 items, Feature Activities: 1st 5 items, Topmanagement: 1st 5 items
Evaluation Method	Both of first and secondarily are distributed the evaluation point: 1000 point. 1 Leadership (120), 2 Strategies Planning (85), 3 Customer and Market Focus (85), 4 Measurement, Analysis, and Knowledge Management (90), 5 Human Resource Focus (85), 6 Process Management (85), 7 Business Results (450).	Both first and secondarily are distributed the evaluation %: 100% (Enablers: 50%, Result: 50%), and to 1 Leadership (10%), 2 Policy & strategy (8%), 3 People (9%), 4 Partnership & Resources (9%), 5 Processes (14%), 6 Customer Results (20%), 7 People Results (9%), 8 Society Results (6), 9 Key Performance Results (15%). RADAR Scoring Matrix is announced as a method of evaluating result.	Both of first and secondarily are distributed the evaluation point: 1000 point. 1. Leadership and Decision Making (120), 2 Social Responsibility in Managements (50), 3 Understanding and Correspondence for Customers and Markets (110), 4 Strategies Development and Deployment (60), 5 Ability Improvement of Individuals and Organization (100), 6 Value Creation Process (120), 7 Information Management (60), 8 Results of Activities (450). T.5 Social responsibility of organization is accomplished.	1530	665	0	67	1242	311	67	1397	1464	1863	599	
ISO9000 Quality System	1 Basis of quality management system is established.	481	592	37	185	259	851	123	37	222	407	111
	2 Management responsibility is clarified.	2925	4467	3838	4553	926	2665	296	666	1555	1999	296
	3 Resource management is established.	0	74	370	321	851	654	74	1814	0	0	37
	4 Product realization process is established.	0	333	2863	3998	518	6182	74	0	148	284	74
	5 Basis of measurement, analysis, and improvement is established.	111	370	1814	1666	74	4516	555	0	148	851	259

Table 5.5 Summary of factor structure of each Award

Name of Quality Award		Criteria Item	2 Social Responsibility	10 Management Responsibility	4 Leader Philosophy	5 Strategic Plan	1 Partner	6 Customer Market	11 Process	3 Cross- Management	8 Information Utilization	9 Human Resources Development	7 Revolutionary Innovation
Malcolm Baldrige National Quality Award	MB1 Leadership is established.		0.4	0.4	0.4								
	MB2 Strategic plan is established.					0.6							
	MB3 Market and customer are focused.							0.6					
	MB4 Information is analyzed.									0.6			
	MB5 Human resources is focused.											0.6	
	MB6 Process management is established.								0.6				
	MB7 Business result is measured and evaluated.		0.4					0.4					
European Quality Award	EQ1 Leadership is established.		0.4	0.4	0.4								
	EQ2 Policy and strategy are established.					0.4	0.4						
	EQ3 People management is established.											0.6	
	EQ4 Partnership and resource control are established.						0.6						
	EQ5 Process is established.								0.6				
	EQ6 Customer results are improved.								0.6				
	EQ7 People results are improved.											0.6	
	EQ8 Society Result are improved.		0.6										
	EQ9 Key performance results are improved.						0.4						
Japan Quality Award	JQ1 Leadership and decision making are established.		0.4	0.4	0.4	0.4							
	JQ2 Social responsibility in management is accomplished.		0.6										
	JQ3 Customer and market are understood and responded.							0.6					
	JQ4 Strategy is settled on and deployed.					0.6							
	JQ5 Ability of individual and organization are improved.											0.6	
	JQ6 Value creation process is established.								0.6				
	JQ7 Information management is established.										0.6		
	JQ8 Result of activities are declared.		0.4						0.4				
Deming Prize	Fundamentals	DF1 Management policy is established and deployed.		0.4		0.4							
		DF2 Product development and business are reformed.								0.4			
		DF3 Quality of product and business are controlled and improved.								0.6			
		DF4 Management system such as QCDSE is maintained.									0.6		
		DF5 Information analysis and IT are used.										0.6	
		DF6 Human Ability is developed.											0.6
	Feature	DS1 Feature of TQM is created.			0.6								
		DS2 Vision, strategy, and leadership are demonstrated.											0.6
		DS3 Customer value is created.							0.6				0.4
		DS4 Performance of organization is improved greatly.											0.6
		DS5 Management base of organization is established.											0.6
		DS6 Others.											0.6
	Topmanagement	DT1 Understanding and zeal to TQM are shown.			0.6								
		DT2 Top has leadership, vision, strategy, policy, and discernment to environmental change.		0.4		0.4							
		The DT3 organization power (core technology, speed, and energies) is maintained and strengthened.					0.4						
		DT4 Human resources is improved.										0.6	
		DT5 Social responsibility of organization is accomplished.	0.6										
	ISO 9001	ISO1 Basis of quality management system is established.		0.6									
ISO2 Management responsibility is clarified.			0.6										
ISO3 Resource management is established.											0.4		
ISO4 Product realization process is established.								0.6					
ISO5 Basis of measurement, analysis, and improvement are established.								0.6					
Relating Award	Relation explanation	Topmanagement leadership			Customer value creation, Product development, production, and offer process								
MBNQA, EQA, JQA, and Deming Prize	Four awards common factor		*	*	*		*				*		
MBNQA, JQA, and Deming Prize	Three Awards common factor	*						*		*			
MBNQA and JQA	Two Awards common factor					*							
EQA and Deming Prize	Factor only of one Award								*			*	

Table 5.6 Common Factor and Factor Loading

Factor Name	Contributory Rate > 0.07, Factor Loading > 0.5	Common Level > 0.8, Factor Loading > 0.5
2. Social Responsibility	MB1 Leadership = 0.6, MB7 Business Result = 0.5, EQ8 Society Results = 0.7, JQ2 Social Responsibility = 0.8, DT5 Social Responsibility of Organization = 0.7	
10. Management Responsibility		DF1 Management Policy = 0.6
4. Leader Philosophy		
5. Strategic Plan		DF1 Management Policy = 0.5
6. Customer Market	MB3 Market and Customer = 0.7, EQ5 Process = 0.7, EQ6 Customer Results = 0.7, JQ3 Customer and Market are understood and responded = 0.9, DS3 Customer Values is created.	JQ3 Customer and Market are understood and responded.
11. Process	MB6 Process Management = 0.6, JQ6 Value Creation Process = 0.7, DF3 Quality of Product and Business are controlled and improved, ISO4 Product Realization Process = 0.8, ISO5 Basis of Measurement, Analysis, and Improvement.	ISO4 Product Realization Process = 0.8, ISO5 Basis of Measurement, Analysis, and Improvement.
8. Information Utilization		
9. Human Resources Development	MB5 Human Resources is focused, EQ3 People Management, EQ7 People Results = 0.8, JQ5 Ability of Individual and Organization = 0.9, DF6 Human Ability is developed = 0.9, DT4 Human Resources is improved = 0.9, ISO3 Resource Management = 0.5	EQ3 People Management, EQ7 People Results = 0.8, JQ5 Ability of Individual and Organization = 0.9, DF6 Human Ability is developed = 0.9, DT4 Human Resources is improved = 0.9,
Remark		Revolutionary Innovation: DS4 Performance of Organization is improved greatly, DS5 Management Base of Organization is established. Factor Loading rounds off two decimal digits.

Table 6.1. Misiona Bilaga National Quality Award Orient. Item time series comparison table (1988-1989, 1989-2003)

MIRADA Criteria in 1988		MIRADA Criteria in 1989		MIRADA Criteria in 1997		MIRADA Criteria in 2001		MIRADA Criteria in 2003	
1. Senior leadership	30	1.1. Senior leadership	30	1.1. Leadership system	80	1.1. Senior leadership	40.00	1.1. Senior leadership	40.00
1.2 Policy	30	1.2. Consistency of quality focus in business unit	20	1.2. Social responsibilities and citizenship	15.00	1.2. Organizational performance	80	1.2. Organizational performance	70
1.3 Business management system and quality management process	30	1.3. Main functions of operation, division and office	50	2.1 Strategy development process	15.00	2.1 Public responsibility and citizenship	40	2.1 Public responsibility and citizenship	20.00
1.4 Distribution and use of resource	20	1.4. Guidance of quality by senior manager	20	2.1 Strategy development process	20.00	2.2 Support to key communities	20.00	2.2 Support to key communities	20.00
1.5 Responsibility to the public	10	1.4.1. Guidance of quality by senior manager (protection are included)	20	2.2 Strategies and action plans	20.00	2.1.1 Strategy development process	20.00	2.1.1 Strategy development process	20.00
1.6 Leadership technique with unique and creativity	10	2.1.1 Information system	25	2.2.1 Human resources	13.33	2.1.2 Strategy objectives	40	2.1.2 Strategy objectives	40
2. Use of analytical techniques or system	15	2.2.1 Data management	15	2.2.2 Performance projection	13.33	2.2 Strategy deployment	45	2.2 Strategy deployment	22.50
2.3 Use of information on behalf of products or services	10	2.3.1 Data analysis	20	3.1.1 Customers and market knowledge	40.00	3.1 Customer and market knowledge	40	3.1 Customer and market knowledge	40.00
2.4 Customer data and analysis	20	3.1.1 Short and long term activities planning processes	30	3.2 Customer satisfaction and relationship enhancement	20.00	3.2 Customer relationship and satisfaction	45	3.2 Customer relationship and satisfaction	22.50
2.5 Vendor's quality and data analysis	10	3.2.1 Competitor comparison	25	4.1. Substantive information and data	25.00	4.1 Measurement and analysis of organizational performance	40	4.1 Measurement and analysis of organizational performance	22.50
2.6 Distributor or the distributor's quality and data analysis	10	3.2.2. Short and long term important quality problem	25	4.2. Substantive information and data	15.00	4.2 Analysis of organizational performance	45	4.2 Analysis of organizational performance	22.50
3. Information and analysis	75	4.1.1 Emphasis execution	25	4.3. Analysis of company performance	20.00	5.1 Work system	35	5.1 Work system	20.00
3.1 Measurement objectives and strategic objectives	20	4.2.1. Quality means to improvements	20	5.1.1 Work and job design	20.00	5.2 Employee well-being and satisfaction	25	5.2 Employee well-being and satisfaction	25.00
3.2 Planning function	20	4.2.2. Employee quality control education according to occupational safety	30	5.1.2 Compensation and recognition	20.00	5.3 Employee well-being and satisfaction	25	5.3 Employee well-being and satisfaction	25.00
3.3 Quality improvement program	30	4.3. Employee quality control education according to occupational safety	20	5.2.1 Work environment	20.00	6.1 Product and service processes	55	6.1 Product and service processes	25.00
3.4 Unique and innovative strategic plan	5	4.4. Recognition to employees	20	5.3.1 Work environment	30.00	6.2 Support processes	15	6.2 Support processes	15.00
4.1. Measurement and administration	30	4.5. Quality of working environment	35	5.3.2 Employee education, training and development	30.00	6.3 Supplier and partner processes	15	6.3 Supplier and partner processes	15.00
4.2 Employee's quality consciousness and participation	50	5.1. Design and introduction of new and improvement products and services	25	5.3.3 Employee education, training and development	30.00	7.1 Customer focused Result of	115	7.1 Customer focused Result of	115.00
4.3 Education and training of quality	30	5.2. Control of production process of product and services	20	5.4.1 Quality assurance and system of products	10.00	7.2 Financial and market results	115	7.2 Financial and market results	115.00
4.4. Selection of personnel for motivation and recognition	30	5.3. Measurement and standard of product, process, and service	15	5.4.2 Quality evaluation of products and services	10.00	7.3 Human resource results	80	7.3 Human resource results	80.00
4.5 Unique and innovative strategic approach to customer opinion in product and service	10	5.4. Audit	20	5.5.1 Quality assurance and system of products	10.00	7.4 Supplier and partner results	25	7.4 Supplier and partner results	25.00
5.1 Reflection of customer's opinion in product and service	20	5.5. Documentation	10	5.5.2 Quality assurance in business and business process	20.00	7.5 Company-specific results	100	7.5 Company-specific results	100.00
5.2 Development of new product or new service	20	5.6. Quality assurance in business and business process	25	5.6.1 Quality assurance of procurement article and service	20.00	7.6 Key quality results	30	7.6 Key quality results	30.00
5.3 Design of new product or new service	30	5.7. Quality assurance of procurement article and service	25	5.7.1 Quality assurance of procurement article and service	20.00	7.7 Extension and effect of quality improvement	20	7.7 Extension and effect of quality improvement	20.00
5.4 Measurement, standardization, and data system	10	5.8. Quality assurance of procurement article and service	25	5.8.1 Quality assurance of procurement article and service	20.00	7.8.1 Extension and effect of quality improvement	20	7.8.1 Extension and effect of quality improvement	20.00
5.5 Technology	10	5.9. Quality assurance of procurement article and service	25	5.9.1 Quality assurance of procurement article and service	20.00	7.8.2 Extension and effect of quality improvement	20	7.8.2 Extension and effect of quality improvement	20.00
5.6 Audit	15	6.1. Quality of product and service	70	6.2. Key quality improvement of procurement of products and services	30	7.9.1 Extension and effect of quality improvement	20	7.9.1 Extension and effect of quality improvement	20.00
5.7 Making to record	10	6.2. Quality improvement of business and business process	60	6.3. Extension and effect of quality improvement	20	7.9.2 Extension and effect of quality improvement	20	7.9.2 Extension and effect of quality improvement	20.00
5.8 Safety and health and environment	10	6.3. Example of executing quality improvement	20	6.4. Extension and effect of quality improvement	20	7.9.3 Extension and effect of quality improvement	20	7.9.3 Extension and effect of quality improvement	20.00
5.9 Awareness effectiveness	15	6.4. Establishment of Customer Service contract standard	20	6.5. Extension and effect of quality improvement	20	7.9.4 Extension and effect of quality improvement	20	7.9.4 Extension and effect of quality improvement	20.00
6.1 Reliability and results of product or service	25	6.5. Reliability and results of product or service	25	6.6. Extension and effect of quality improvement	20	7.9.5 Extension and effect of quality improvement	20	7.9.5 Extension and effect of quality improvement	20.00
6.2 Decrease of scrap, adjustment and rework	20	6.6. Decrease of scrap, adjustment and rework	20	6.7. Extension and effect of quality improvement	20	7.9.6 Extension and effect of quality improvement	20	7.9.6 Extension and effect of quality improvement	20.00
6.3 Decrease of complaint level related to quality	25	6.7. Decrease of complaint level related to quality	25	6.8. Extension and effect of quality improvement	20	7.9.7 Extension and effect of quality improvement	20	7.9.7 Extension and effect of quality improvement	20.00
6.4 Decrease of guarantee or risk support work	20	6.8. Decrease of guarantee or risk support work	20	6.9. Extension and effect of quality improvement	20	7.9.8 Extension and effect of quality improvement	20	7.9.8 Extension and effect of quality improvement	20.00
6.5 Innovative indicator to improve quality or service	10	6.9. Innovative indicator to improve quality or service	10	6.10. Extension and effect of quality improvement	20	7.9.9 Extension and effect of quality improvement	20	7.9.9 Extension and effect of quality improvement	20.00
7.1 Quality of product and customer's viewpoint	100	7.1. Quality of product and customer's viewpoint	100	6.11. Extension and effect of quality improvement	20	7.9.10 Extension and effect of quality improvement	20	7.9.10 Extension and effect of quality improvement	20.00
7.2 Customer satisfaction degree	50	7.2. Customer satisfaction degree	50	6.12. Extension and effect of quality improvement	20	7.9.11 Extension and effect of quality improvement	20	7.9.11 Extension and effect of quality improvement	20.00
7.3 Measuring method and results of customer satisfaction degree	25	7.3. Measuring method and results of customer satisfaction degree	25	6.13. Extension and effect of quality improvement	20	7.9.12 Extension and effect of quality improvement	20	7.9.12 Extension and effect of quality improvement	20.00
		7.4. Guarantee that stands in customer's viewpoint	30	6.14. Extension and effect of quality improvement	20	7.9.13 Extension and effect of quality improvement	20	7.9.13 Extension and effect of quality improvement	20.00
		7.5. Determination the customer satisfaction degree	25	6.15. Extension and effect of quality improvement	20	7.9.14 Extension and effect of quality improvement	20	7.9.14 Extension and effect of quality improvement	20.00
				6.16. Extension and effect of quality improvement	20	7.9.15 Extension and effect of quality improvement	20	7.9.15 Extension and effect of quality improvement	20.00
				6.17. Extension and effect of quality improvement	20	7.9.16 Extension and effect of quality improvement	20	7.9.16 Extension and effect of quality improvement	20.00
				6.18. Extension and effect of quality improvement	20	7.9.17 Extension and effect of quality improvement	20	7.9.17 Extension and effect of quality improvement	20.00
				6.19. Extension and effect of quality improvement	20	7.9.18 Extension and effect of quality improvement	20	7.9.18 Extension and effect of quality improvement	20.00
				6.20. Extension and effect of quality improvement	20	7.9.19 Extension and effect of quality improvement	20	7.9.19 Extension and effect of quality improvement	20.00
				6.21. Extension and effect of quality improvement	20	7.9.20 Extension and effect of quality improvement	20	7.9.20 Extension and effect of quality improvement	20.00
				6.22. Extension and effect of quality improvement	20	7.9.21 Extension and effect of quality improvement	20	7.9.21 Extension and effect of quality improvement	20.00
				6.23. Extension and effect of quality improvement	20	7.9.22 Extension and effect of quality improvement	20	7.9.22 Extension and effect of quality improvement	20.00
				6.24. Extension and effect of quality improvement	20	7.9.23 Extension and effect of quality improvement	20	7.9.23 Extension and effect of quality improvement	20.00
				6.25. Extension and effect of quality improvement	20	7.9.24 Extension and effect of quality improvement	20	7.9.24 Extension and effect of quality improvement	20.00
				6.26. Extension and effect of quality improvement	20	7.9.25 Extension and effect of quality improvement	20	7.9.25 Extension and effect of quality improvement	20.00
				6.27. Extension and effect of quality improvement	20	7.9.26 Extension and effect of quality improvement	20	7.9.26 Extension and effect of quality improvement	20.00
				6.28. Extension and effect of quality improvement	20	7.9.27 Extension and effect of quality improvement	20	7.9.27 Extension and effect of quality improvement	20.00
				6.29. Extension and effect of quality improvement	20	7.9.28 Extension and effect of quality improvement	20	7.9.28 Extension and effect of quality improvement	20.00
				6.30. Extension and effect of quality improvement	20	7.9.29 Extension and effect of quality improvement	20	7.9.29 Extension and effect of quality improvement	20.00
				6.31. Extension and effect of quality improvement	20	7.9.30 Extension and effect of quality improvement	20	7.9.30 Extension and effect of quality improvement	20.00
				6.32. Extension and effect of quality improvement	20	7.9.31 Extension and effect of quality improvement	20	7.9.31 Extension and effect of quality improvement	20.00
				6.33. Extension and effect of quality improvement	20	7.9.32 Extension and effect of quality improvement	20	7.9.32 Extension and effect of quality improvement	20.00
				6.34. Extension and effect of quality improvement	20	7.9.33 Extension and effect of quality improvement	20	7.9.33 Extension and effect of quality improvement	20.00
				6.35. Extension and effect of quality improvement	20	7.9.34 Extension and effect of quality improvement	20	7.9.34 Extension and effect of quality improvement	20.00
				6.36. Extension and effect of quality improvement	20	7.9.35 Extension and effect of quality improvement	20	7.9.35 Extension and effect of quality improvement	20.00
				6.37. Extension and effect of quality improvement	20	7.9.36 Extension and effect of quality improvement	20	7.9.36 Extension and effect of quality improvement	20.00
				6.38. Extension and effect of quality improvement	20	7.9.37 Extension and effect of quality improvement	20	7.9.37 Extension and effect of quality improvement	20.00
				6.39. Extension and effect of quality improvement	20	7.9.38 Extension and effect of quality improvement	20	7.9.38 Extension and effect of quality improvement	20.00
				6.40. Extension and effect of quality improvement	20	7.9.39 Extension and effect of quality improvement	20	7.9.39 Extension and effect of quality improvement	20.00
				6.41. Extension and effect of quality improvement	20	7.9.40 Extension and effect of quality improvement	20	7.9.40 Extension and effect of quality improvement	20.00
				6.42. Extension and effect of quality improvement	20	7.9.41 Extension and effect of quality improvement	20	7.9.41 Extension and effect of quality improvement	20.00
				6.43. Extension and effect of quality improvement	20	7.9.42 Extension and effect of quality improvement	20	7.9.42 Extension and effect of quality improvement	20.00
				6.44. Extension and effect of quality improvement	20	7.9.43 Extension and effect of quality improvement	20	7.9.43 Extension and effect of quality improvement	20.00
				6.45. Extension and effect of quality improvement	20	7.9.44 Extension and effect of quality improvement	20	7.9.44 Extension and effect of quality improvement	20.00
				6.46. Extension and effect of quality improvement	20	7.9.45 Extension and effect of quality improvement	20	7.9.45 Extension and effect of quality improvement	20.00
				6.47. Extension and effect of quality improvement	20	7.9.46 Extension and effect of quality improvement	20	7.9.46 Extension and effect of quality improvement	20.00
				6.48. Extension and effect of quality improvement	20	7.9.47 Extension and effect of quality improvement	20	7.9.47 Extension and effect of quality improvement	20.00
				6.49. Extension and effect of quality improvement	20	7.9.48 Extension and effect of quality improvement	20	7.9.48 Extension and effect of quality improvement	20.00
				6.50. Extension and effect of quality improvement	20	7.9.49 Extension and effect of quality improvement	20	7.9.49 Extension and effect of quality improvement	20.00
				6.51. Extension and effect of quality improvement	20	7.9.50 Extension and effect of quality improvement	20	7.9.50 Extension and effect of quality improvement	20.00
				6.52. Extension and effect of quality improvement	20	7.9.51 Extension and effect of quality improvement	20	7.9.51 Extension and effect of quality improvement	20.00
				6.53. Extension and effect of quality improvement	20	7.9.52 Extension and effect of quality improvement	20	7.9.52 Extension and effect of quality improvement	20.00
				6.54. Extension and effect of quality improvement	20	7.9.53 Extension and effect of quality improvement	20	7.9.53 Extension and effect of quality improvement	20.00
				6.55. Extension and effect of quality improvement	20	7.9.54 Extension and effect of quality improvement	20	7.9.54 Extension and effect of quality improvement	20.00
				6.56. Extension and effect of quality improvement	20	7.9.55 Extension and effect of quality improvement	20	7.9.55 Extension and effect of quality improvement	20.00

Table 8.6 Transition table of each functional division by age N=355 (1960~1990)

Main function	Division	Name of similar function	1960's				1970's				1980's				1990's		Total		
			In the first half		In the later half		In the first half		In the later half		In the first half		In the later half		Only four in 1990				
			Matter	%	Matter	%	Matter	%	Matter	%	Matter	%	Matter	%	Matter	%		Matter	%
Main function	Quality assurance	Quality control, quality improvement, and PLP	4	100	9	32.1	9	39.1	20	42.7	25	29.7	31	26.8	4	20	102	28.7	
	Cost management	Cost reduction and expense control			5	17.8	5	21.7	7	15	13	15.4	21	14.1	4	20	55	15.5	
		Construction profit management			1	3.6	1	4.4	3	6.4	7	8.3	8	5.4			20	5.6	
		Amount of management	Production amount management, delivery date management, production			5	17.8	5	21.7	6	12.8	15	17.8	24	16.1	4	20	59	16.6
		Human resources management	Human resources development and morale			3	10.7	2	8.7	2	4.2			3	2	1	5	11	3.1
	Support function	New product development	New product control, advance development, technological development, research and development management, and product control			1	3.6	1	4.4	1	2.1	6	7.1	20	13.1	3	15	32	9
		Sales management	Ordering activity management and sales activity management			1	3.6			2	4.2	8	9.5	15	10.1	1	5	27	7.6
		Purchase control	Subcontract management, supplier management, and cooperation company			1	3.6			2	4.2	5	6	8	5.4	1	5	17	4.8
		Safety control	Crime prevention management and safety and healthcare management							2	4.2	2	2.4	10	6.7	1	5	15	4.2
		Environmental protection	Antipollution policy and measures							2	4.2	1	1.2	4	2.7	1	5	8	2.2
	Equipment control	Equipment QA, TPM, plant maintenance, equipment development, and equipment									2	2.4	4	2.7			6	1.7	
	Information management	Affairs management and information system			2	7.1							1	0.6			3	1	
	Total	Total	4	100	28	100	23	100	47	100	84	100	149	100	20	100	355	100	
Remarks	PLP (Kubota Iron Works: 1976) and the production preparation and production (ASIN Light Metals: 1988, ASIN Shinwa: 1989, and AISIN Hoyo: 1990) were included in the quality assurance. * The construction synthesis management was the overall care of works of quality assurance (Q) cost management (C) term of works management (D) accident prevention (S) in the construction industry, and Shimizu Construction (1983) used first, and it spread afterwards. Because another function had been counted respectively here, it included it in amount management.																		

Table 8.7 Problem before introduction of Cross-Functional Managements (common, quality assurance) (1960-1990) 102 companies

Division	Step	Problem	Key word					
Common	38	Cooperation between divisions	38					
		38	30					
Quality Assurance	507	Whole	53	All company quality assurance system corresponding to market and customer needs is incomplete.	17	Market and customer needs, all company quality assurance system, mechanism		
				The idea and the way to advance the quality assurance are not	11	Indefinite idea, product out proceeding		
				The evaluation and the improvement of the quality assurance are insufficient.	9	Difference between evaluation and approach		
				Employee's quality awareness is low.	8	Attitude to quality, quality awareness		
				The education of the manager and the staff is incomplete.	5	Immature of analytical power and statistical ability, study shortage		
		Project	88	It is an idea of the cost and amount focus.	3	Costs reduction, amount and delivery date improvement		
				The grasp of demanded quality is insufficient and the collection of market quality information is insufficient.	25	Demanded quality, needs, how to use it, and market quality information		
				The analysis of market and customers' needs, quality information, the research of competitor are insufficient.	14	Quality information analysis and competitor research		
				The approach of project of attractive product for the market and customer is insufficient.	14	Product project, reflection of demanded quality, and timely		
				The mechanism of QA of new product development for the market and customer needs taking in advance is incomplete.	11	Quality assurance, source, and taking in advance of new product development		
				Development and built-in of quality at the product project stage are	10	Built-in quality, quality deployment, quality objective		
				Sales decrease, share decrease by unpalatable of product project, and customer trouble occurrence	9	Sales decrease, share decrease, production plan change, and customer trouble		
				Prompt correspondence to market and customer needs is insufficient.	5	Correspondence to market, customer needs, and quality information		
				Development	28	The advance development system of the market and the customer needs is insufficient.	9	System of advance development
						Built-in of the quality in the development phase is insufficient.	7	Built-in, quality characteristics, bottleneck technology, and next process transmits.
		Organizing the technology corresponding to the market and customer needs is lacked.	5			Organizing of possession technology and reliability technology		
		PDCA of the development phase doesn't turn.	4			Incompleteness of plan, it doesn't advance according to schedule. The evaluation is weak.		
		A new product and new technological development are the product outs of the Development Department and Engineering Department initiation.	3			Engineering Department initiation, and peculiar technological oriented.		
		Design, trial	43	The problem of the design and trial flowed out to the post-processes (mass production, service, user).	16	Trouble, omission, and complaint and a service amount increase		
				A prior study of quality at design and trial stage is insufficient.	8	Prior study and quality evaluation confirmation		
				Built-in of the quality at design and trial stage is insufficient.	7	Built-in design, transmission of design intention		
				The quality demand of the market and customer is not reflected into the design.	6	Demanded quality, insufficient realization of quality, only agreement of customers' specifications		
				There are a lot of design changes of new product.	6	Design change and trouble		
		Production preparation	40	Outflow of problem of production preparation stage to post-process (production standing up etc.)	20	Production standing up trouble, process stabilization, and complaint		
				Built-in of the quality at production preparation stage is insufficient.	8	Built-in of quality		
				The quality assurance system at the production preparation stage is incomplete.	7	Site leaving, responsibility authority and standards		
				A prior study at the production preparation stage is insufficient.	5	Prior preparation study		
				The realities grasp, selection and evaluation of supplier is insufficient.	12	Selection evaluation		
		Purchase subcontract	37	Quality assurance system and cooperative relationship of supplier and cooperation company are incomplete	7	Cooperative relationship and contract dependence constitution		
				Guidance to the cooperation company is insufficient.	6	Guidance and manual		
				Purchase and subcontract policy is indefinite.	4	Influence by the amount and the delivery date, order method is asunder.		
				The business allotment to purchase in the headquarters and factory is indefinite.	4	Business allotment		
				The supplier and cooperation company's quality ability are low.	4	Quality level and quality assurance problem		
		Manufacturing	132	There are a lot of defective in processes.	22	Adjustment, rework, fault, defect, loss from spoilage expensive cost		
				The improvement activity of defective preprevention and recurrence prevention that holds factor system is insufficient.	20	Emergency measure, preprevention, recurrence prevention, factor system, and drastic measure		
				The quality assurance is an inspection emphasis principle.	18	Enough in inspection initiation, legal and customer check		
				Quality built-in process is weak.	16	Built-in of quality and quality evaluation		
				The collection and analysis of the data of factor system are weak	15	Importance of data, factor analysis, and problem solving power		
				The setting, the education, and the observance of the operation standard are insufficient.	14	Operation standard, education, and observance		
				The process control system is incomplete.	12	Process control, control chart, factor management, and after pursue control		
				Balance of the quality improvement and the efficiency improvements is insufficient.	9	Quality improvement, efficiency, and production plan		
		Equipment QA		There are a lot of troubles at the time of the mass production standing up.	6	Defective quality, accident, first of production defective rate, and defective delivery		
				Breakdown and trouble of equipment, and defective of cause of equipment happen.	8	Breakdown, trouble, and defect		
				Equipment and tools is incomplete and the measurement management is insufficient.	5	Equipment, tools, and measurement management		
		Sales service		The equipment quality assurance is insufficient.	5	improvement of equipment, quality improvement, Study when is procured		
				There are a lot of complaints and a quality troubles.	26	Complaint, quality trouble, and critical quality issue		
				There are a lot of emergency measures in complaint treatment, and claim management's correspondence is slow.	16	Complaint treatment, and emergency measures		
				The service activity to answer the customer expectation is lack.	9	Service. It only has to do only service		
				Lacks of collection of pursuit data of quality in market, aggressiveness of improvement, and organization activity	7	Potential complaint, field data, and feedback		
		Total	507	507	507	The attention of the reflection is lacked in the amends oriented after the fact.	4	Amends after the fact
Remarks	The figure of each column is a problem number. Because the cooperation between divisions appeared at each division, it put it in "Commonness" as a total meter. Describing clearly "Problem" was coming after in 1980's and it came to write in detail, after especially 1985.							

Table 8.8 Problem before introduction of Cross-Functional Management
(cost and profit, amount and delivery date, new product development, sales, safety and Healthcare) (1960-1990), 102 companies

Division	Step	Problem	Key word				
Cost and profit management	106	Management system	55	Cost project is insufficient.	14	Built-in cost of development and design stage, target cost	
				Prompt analysis and feedback action of the cost and the profit data is weak.	12	Analysis of data and report to top and action	
				Long term and fiscal year profit plan for an environmental change are incomplete.	11	Long-range management planning, strategy, and target(budget)	
				Cost and the profit management system are insufficient.	9	Cost and profit management system	
				Budget and the cost system are old-fashioned.	9	Rul of thumb, only of management according to items of expenses, extraordinary loss	
		Management consideration	13	Consideration and recognition to profit and cost are weak.	7	Understanding, recognition, and consideration to profit and cost	
				Sales first principle	6	Sales oriented	
		Improvement activity	14	Scientific all company profits and cost improvement activities are insufficient.	14	Reduction in cost, labor cost, and overhead cost	
		Achievement		It is easy to receive the influence of the economic fluctuation.	9	Change of exchange market price, raw material amount, and order	
			Sales and profit target underachievement	9	Sales, profit, and share		
	Increase of stock		3	Stock increase			
			Interest cost and stay claim increase	3	Interest cost and stay claim		
Total	106	106	106				
Amount and delivery date management	79	Management system	10	Production management system to demand for upgrade and diversification of customer needs is insufficient.	10	Sales forecast, upgrade, diversification, product abolition, and part switch	
				Loss by process complication increases.	11	Arrangements switch loss, running out of stock, and line balance	
		Production plan, process organization		20	There are a lot of production plan changes.	9	Production plan change and concentrated production at the end of the month
				14	Trouble at mass production standing up stage is a lot.	8	Standing up is instability, and longbetween periods, initial flow management
		Production preparation, mass production			Design and production preparation system corresponding to diversification of customer needs is insufficient.	6	Drawing multi, drawing leakage, and increase of number of metal molds
				9	Equipment ability and efficiency corresponding to demand are insufficient.	5	Maintenance ability, efficiency, and equipment introduction
		Equipment control			Automating the process doesn't advance.	4	Automating technology, design, and continuous supply for 24 hours
			12	Delay of correspondence to user's needs of short delivery date	7	Short delivery date, long turn, and prompt delivery	
Delivery date management			Delivery date accomplishment rate is bad.	5	Delivery date delay and delivery date accomplishment rate		
		14	Increase of amount of stock	11	Stock increase, abnormal stock, and stagnation		
			Sales and production target underachievement	3	Target underachievement and growth rate becoming duller		
Total	79	79	79				
New product development	108	New product development system	23	Mechanism of the new product development is weak.	12	Organizational development, Cardinal rule of all companies	
				Quality development system has not been established.	11	Quality objective, bottleneck technology, andbuilt-in quality	
		Collection of product strategy information		26	Search, collection, and transmission of product planning information like market, customer, and technology, etc. are insufficient.	15	Information gathering and product planning
					Strategic product development in long range perspective is not planned.	11	Long-term strategic product planning and development plan
		Project power technology		31	Advanced technology shortage corresponding to new field	17	New field, diversifying, high classing, after following technological development
					Project and development power of new product and new technology that took needs in advance in the future are weak	14	Sporadic product planning and passivedevelopment.
Development period prior study		33	Outflow of problem to post-process due to prior study shortage of project, development, and design stage	15	Prior study and problem outflow to post-process		
			New product development period late, and timing.	13	Timing and initial flow management at development period		
Total	108	108	108				
Sales management	77	Business posture	25	Mid/long-term business strategy is lacked.	11	Long-term, strategic, premeditation, foreign	
				It is not business of the attack.	8	Correspondence to customer and user, development of new field	
				It is passive business.	6	Passive. Existing customer, and subcontract constitution	
		System of business management		17	It is not systematic business.	9	Systematic, cooperation between divisions and individual business
					Business management system corresponding to market and customer's changes is weak.	8	Change of market and customer, system of business, and order management
Use of information		20	Collection, analysis, and use of marketand customer information do'nt do.	13	Information gathering, grasp, and analysis		
			It is not process oriented business for best use of information by the result oriented.	7	Result focus, process focus, and best use of information		
Business results		15	The commodity and sales project to new field where the customer needs were understood are weak.	10	Sales project, customer needs grasp, and product planning		
			The order is unable to move upward, and new field and new product are inactive sales.	5	Order amount, and new field and new product order amount		
Total	77	77	77				
Safety and health care management	13	13		Safety and healthcare management activity and system are insufficient.	6	Safety and healthcare management system and prospect danger activity	
				There are a lot of industrial injuries.	4	Industrial injury, closed disaster, fire, andpoisonous material	
				Safety consciousness and safety education and training are insufficient.	3	Disaster prevention guidance, no disaster experience, and safety consciousness	
Total	13	13	13				
Total sum	928	928	928				
Remarks	The figure of each column is a number of problems. The total of the problem of the Cross-Functional Management introduction enterprise was shown as "Total". Environmental protection contains it in the management for safety andhealthcare. The item of the new product development and retail management comes to be explained independently from about 1980, it increased after 1985, and most enterprises have installed the paragraph of the new product development after especially 1987.						

Table 8.10 Effects after introduction of Cross-Functional Management (common and quality assurance) (1960-1990) 102 companies

Division		Step	Effects	Key word			
Common	101	Cross-Functional Management	Cooperation between divisions strengthened.	53	Cooperation between divisions cooperative operation between divisions		
			Cross-Functional Management advanced, and management system strengthened.	9	Cross-Functional Management System and management system		
			It becomes channel of information to clarify, proposal of bottom-up opinion to go out easy, and decision making speeds up.	9	Information root, communications channel, proposal, and decision making		
			Cross-Functional responsibility and authority clarified.	6	Cross-functional responsibility, authority, and management item		
			Corporate constitution has improved.	3	Corporate constitution		
		Idea quality consideration of QC	21	Idea and the technique of QC infiltrate, and problem solving power improves.	11	QC technique, idea, and problem solving power	
				It has advanced from management of result oriented to management of unprevention.	6	Result oriented, prior response, forecast	
				Quality awareness infiltrated, and improvement desire has improved.	4	Quality awareness and improvement desire	
				Idea and consideration of market in, quality first and quality assurance	30	Market in, quality the first, and quality	
				Quality assurance system was maintained.	25	Quality assurance system, built-in quality system, and QA diagnosis	
Quality assurance	518	General	Mutual trust with the customer has become strong.	15	Mutual trust and confidence with customer		
			Improvement of product quality and strengthening of quality leadership basis	15	Improvement of quality, highest quality, and quality leadership		
			Standardization concerning quality assurance has advanced.	15	Specification, standard, form maintenance and revision		
			Level of the quality assurance has improved.	14	Quality assurance and built-in quality activity		
			Solving activity of important quality issue advances and it has been improved greatly.	11	Important quality issue		
			Technique of quality assurance was developed and used.	11	QFD, FMEA, and reliability		
			Project	35	It became a constitution that make built-in project quality from the source.	12	Built-in quality from source, quality oriented
					Difference and achievement level of project quality target have been improved	11	Difference and achievement level of project quality
					Project theme and quality objective suitable for customer needs have	4	Project target suitable for needs
					Collection, analysis, and use of information at the project stage have advanced.	4	Information gathering, analysis, and use of market quality information
		Development	6	Trouble by project quality into post-process has decreased.	4	Project quality trouble	
				Built-in quality activity in development stage was established.	6	Development and built-in quality	
		Design making for trial purposes	45	Trouble number decrease in post-process by design factor	18	Design responsibility complaint, trouble, and design change	
				Improvement of quality of design	10	Quality of design	
				Improvement of reliability and reliability technology	10	Reliability, technology, and reliability design	
				Establishment of design review (DR) system	7	DR and design review	
		Production preparation	27	Stabilization of quality at early stage of new product standing up	12	Stabilization at time of standing up	
				Trouble decrease in post-process by factor of production preparation stage	8	Trouble at time of standing up and complaint after start of mass production	
				Enhancement of quality assurance in production preparation and initial flow management	7	Initial flow management and QA of production preparation stage	
		Purchase and subcontract	40	Decrease of delivery inspection failing rate (defective rate)	22	Delivery defect, acceptance inspection failure rate	
				Cooperation trader's TQM has advanced.	10	Cooperation trader's TQM and QC Circle	
				Improvement of subcontractor quality evaluation	4	Quality evaluation and no inspection delivery of cooperation manufacturer	
				Connected quality assurance including cooperation trader	4	Connected quality assurance	
		Manufacturing	101	Decrease of defective in process and defective loss	37	Defective in process and inspection defect rate and defective loss	
				Maintenance of process control system	15	Process control	
				Activation of quality improvement activity	13	QC activity, improvement activity, and quality issue	
				Trouble decrease in process and improvement of direct rate	10	Process trouble and direct flow rate	
				Improvement of process capacity	10	Process capacity	
				Idea of built-in quality in the process persists.	9	Built-in quality in process.	
				Maintenance of process quality evaluation system	7	Process quality evaluation	
		Equipment QA	30	A defective quality decrease in capacity utilization rate improvement, failure rate decrease, and equipment originating	9	Operating ratio, failure rate, frequency rate, and defective rate	
				Promotion of equipment improvement by use of quality development	7	Quality deployment, equipment development, and equipment improvement	
				Making of introduction and standing up of equipment and smooth making to a short term	6	Introduction and standing up of equipment	
				Maintenance of system of production maintenance	4	Productive maintenance and equipment control	
				Consideration of built-in quality by equipment arose.	4	Built-in quality by equipment, equipment is defended for myself.	
		Sales service		Decrease of complaint and customer trouble	45	Complaint and customer trouble	
				Improvement of customer satisfaction degree	15	Customer satisfaction degree	
				Improvement of market quality evaluation point	14	Market quality evaluation	
				Maintenance of Customer Service system	9	Customer Service and after service	
				Improvement activity based on customer quality information has advanced.	9	Customer quality information, data, analysis, and recurrence prevention	
		Total	619	619	619	619	
							Remarks

Table 8.11 Effect after introduction of Cross-Functional Managements
(cost and profit, amount and delivery date, new product development, sales, safety and healthcare) (1960-1990) 102 companies

Division	Step	Effects	Key word
Profit and cost management	Management system	Establishment of profit and system of cost management	13 Profit, cost management system, and management accounting system
		Maintenance of profit and cost project (cost planning) system	10 Profit and cost project, built-in cost at development and trial stages
		Role of each division in profit and cost management	5 Role of division and allotment according to step
		Improvement of financial constitution	4 Financial constitution, financial account balance, and extraordinary loss
		Improvement of profit plan accuracy	4 Plan accuracy and assumption profit
	Management consideration	16 Improvement of profit and cost management, improvement consideration and desire	16 Profit and cost awareness, and improvement desire
	Improvement activity	18 Profit and cost improvement activity are persisted and have been activated.	14 Profit management activity, cost decrease activity, and VE
		Idea and technique of cost improvements of quality cost and design cost, etc. raise the level.	4 Quality and design cost, cost up, and cost push
	Achievement	43 Cost of raw materials and manufacturing cost decrease	13 Raw material, man-hour, assembly cost, and cost down
		Profit and profit ratio have improved.	11 Profit, profit ratio, and target profit
		Achievement of target cost	6 Target cost
		Improvement of added value (ratio)	5 Value-added per person and value added
		Sales have improved by cost competitiveness	5 Sales and export amount
Efficiency of Indirect department has advanced.		3 Management division expenditure rate and indirect division efficiency improvement	
Total	113	113	113
Amount and delivery date management	Management system	13 Establishment of amount management system	13 Production management and efficient production system
	Production plan	12 Shortening at production period	9 Production period and lead time
	Productivity	12 Improvement of production plan accomplishment rate	3 Production plan accomplishment rate
		21 Productivity improvement	17 Productivity and manufacturing efficiency
	Automation of	21 Improvement of design productivity	4 Productivity of designing department and estimate department
	Delivery date	5 Automation of equipment and labor saving	5 Process automation and rationalization, mechanization, and labor saving
	Amount of sales stock	13 Delivery date delay decrease and delivery date observance rate improvement	13 Delivery date delay, accomplishment rate, and observance rate
23 Stock amount decrease and running out of stock rate decrease		18 Stock, asset turnover, and amount of stock	
Total	87	87	87
New product development	New product development system	26 New product research development system was established.	15 New product and technological development, advance development system, and RDM
		Built-in QCD at new product development stage was strengthened.	11 DR, target cost achievement, and development process ability
	Product strategy information gathering	16 Customer needs are understood, and advance new product development is strengthened and enhanced.	10 Market and customer needs, and advance development activity
		New product development in long-term plan came to advance.	6 Emphasis development long term problem
	The customer's confidence securing	13 Customer reliability and corporate image were improved by enhancing new product development activity.	8 Customer's trust and corporate image
		It came to be able to do the joint development to satisfy user demand.	5 Joint development, cooperative relationship strengthening, and commercialization
	Project power technology	19 Independent activity of new product project development became active.	10 New product project activity and independent development
		Improvement of area of differentiation technology and peculiar technology was attempted.	9 Differentiation technology, peculiar technology, and advance technology
Use of idea technique of QC	18 DR, QFD, and new product development tool of reliability etc. are used.	10 DR, QFD, and reliability	
	Importance of market in and source management was recognized.	8 Market in and source management	
Development period	16 Shortening at standing up period of new product development period	16 Standing up period of new product	
	Achievement	78 Expansion of new product and improvement of new product sales	37 New product sales
		Increase in new product development number	25 New product development number
Increase of patent application number		16 Patent application number and utility model	
Total	186	186	186
Retail management	Business posture	14 It came to be able to do business activity of data and process oriented.	9 Data and process oriented, emphasis aim, and QC technique
		It converted from passive business to business of the	5 Sales of attack and proposal sales
	System of business management	14 Strengthening and enhancement of sales management system	8 Sales and order management system, and strategic PDCA
		Sales know how and activity method were enhanced.	6 Technological business knowhow and marketing method and route
Use of information	9 Collection and use of sales information were strengthened and enhanced.	9 Information gathering and use, and grasp of customer demand	
	Achievement	33 Increase in sales, number of products, and number of customers	24 Sales, number of products, and number of customers
Total		70	70
Safety and healthcare management	9	Safety and healthcare accident none	3 Safety healthcare accident
		Safety management standard observance	2 Safety code and independent management
		Safety and danger prospect activity were activated.	2 Disaster case use and danger prospect activity
Total	9	9	9
Total sum	1084	1084	1084
Remarks	Figure of each column is the number of cases in the effect. Item of the new product development and retail management came to be explained independently in around 1980, and it increased after 1985.
