

## Acknowledgement

I would like to express my profound gratitude for guidance, warm encouragement and generous help received from Prof. S. M. Lee. I am deeply grateful to Prof. I. Arai for valuable and a lot of discussions, and especially his studies of contribution to the numerical analysis. And, Prof. K. Yabana for valuable discussions and a lot of suggestion especially in theoretical interpretation. I would like to thank Prof. K. Furuno, Prof. Y. Tagishi, Prof. Y. Miake and Prof. Y. Aoki for hearing my long representations and a lot of valuable comments. I am much indebted to the research collaborators, M. Imanaka, R. Fujita, K. Uchida and H. Sasaki for their help in preparing and performing the experiments and discussion, and especially Dr. S. Tomita for his continuous encouragement, kind support and a lot of helpful advices for the whole of this research activities. I gratefully acknowledges suggestive discussions with all member of our research group, and also deeply indebted to all professors, students and the technical staffs of the Tandem Accelerator Center in University of Tsukuba for their support. Heartfelt thanks go to Mr. T. C. Copeland for making an effort to polish up the English of this thesis, and to all people who has given me so assistance, scholarship and stimulus.
