

Acknowledgements

I am grateful to the Institute for Molecular Science for allowing us to use their computers and the Gaussian 80, 82, 86, 94, 98 and MOPAC programs. I am also grateful to Professor S. Ikuta for the use of their computer time (SP2), the Gaussian 94 and technical advice. I also thank Professor T. Watanabe for the approval of this work. I thank Professor O. Kikuchi for his guidance.
