Histochemical Studies on the Olfactory Pathways
in the Silkworm Brain
with the Support of Neuron Database

A Dissertation Submitted to
the Graduate School of Life and Environmental Science,
the University of Tsukuba
in Partial Fulfillment of the Requirements
for the Degree of Doctor of Philosophy in Science
(Doctoral Program in Functional Bioscience)

Masaaki IWANO

Table of Contents

Abstract	3
List of Abbreviations	6
1. Introduction.....	8
1.1 Neuroactive substance in the antennal lobe neural pathways	9
1.2 Odor-evoked locomotion control system in the protocerebrum.....	12
2. Materials and methods.....	16
2.1 Animals	16
2.2 Histochemistry.....	16
2.2.1 Immunocytochemistry.....	16
2.2.2 Confocal microscopic study.....	19
2.2.3 Three-dimensional reconstruction of the antenno-cerebral tracts and surrounding neural structures.....	19
2.3 Neuron Database analysis.....	20
2.3.1 Selection of immunocytochemical double labeling candidate from Neuron Database	20
2.3.2 Extraction of neurons for cellular organization analysis	21
2.3.3 Representation of morphological properties of LAL-VPC intrinsic neurons.....	22
3. Result	23
3.1 Neuroactive substance in the antennal lobe neural pathways	23
3.1.1 Antennal lobe structure	23
3.1.2 Projection pathways connecting the antennal lobe with the protocerebrum	24
3.1.3 Distribution pattern of immunoreactivity in the antennal lobe.....	25

3.2 Odor-evoked locomotion control mechanism in the protocerebrum	29
3.2.1 Neural structure of the LAL and VPC.....	29
3.2.2 LAL-VPC intrinsic neurons extracted from Neuron Database	31
3.2.3 General morphology and physiology of LAL-BLs	31
3.2.4 Analysis of LAL-BLs.....	32
3.2.5 General morphology and physiology of LAL-VPC LNs.....	36
3.2.6 Distribution pattern of immunoreactivity in the LAL-VPC	39
4. Discussion	40
4.1 Neuroactive substance in the antennal lobe neural pathways	40
4.1.1 Organization of antennal lobe neural pathway	40
4.1.2 Cellular organization of immunoreactive neurons in the AL	41
4.1.3 Neuroactive substances in the olfactory processing in the AL.....	44
4.1.4 Neuroactive substances in the projection pathways to higher olfactory center....	45
4.2 Odor-evoked locomotion control mechanism in the protocerebrum	46
4.2.1 Summary of LAL-VPC neural network.....	46
4.2.2 Long-lasting activity generation hypothesis	47
4.2.3 Hypothesis for generating the alternated activity pattern	50
4.2.4 Odor-orientation zigzagging behavior in the insect	56
Acknowledgments	58
References.....	59
Figures and legends	69
