CYTOLOGICAL ANALYSIS OF MATERNAL-EFFECT MUTATIONS  
AFFECTING FUNCTIONS OF CYTOSKELETAL ELEMENTS  
IN DROSOPHILA EARLY DEVELOPMENT

Ko HATANAKA

December

1991

Submitted in partial fulfillment of the requirements for  
the degree of Doctor of Science, in Doctoral Program in  
Biological Sciences, University of Tsukuba.

95301696

## CONTENTS

ABSTRACT	...	1
INTRODUCTION	...	6
MATERIALS AND METHODS	...	12
1. Fly stocks	...	12
2. Egg collection	...	14
3. Nuclear staining	...	15
4. Staging of embryos	...	16
5. Time-lapse video analysis of live embryos	...	17
6. Histology	...	17
7. Electron microscopy	...	17
8. Cuticle preparations	...	18
9. Application of inhibitors	...	18
10. Determination of three-dimensional nuclear position in embryos at cycle 1 and 2	...	19
11. Double fluorescent staining of nuclei and F-actin	...	20
12. Two-dimensional gel electrophoresis	...	22
RESULTS	...	23
1. Division and migration of nuclei at cleavage stages	...	23
1.1. Egg contraction in <u>N441</u> , <u>N26</u> and <u>par</u> embryos	...	23
1.2. Division and migration of nuclei	...	23
1.3. Quantitative analysis of nuclear migration toward the poles in wild-type and mutant embryos	...	25
1.4. Effects of <u>N441</u> , <u>N26</u> and <u>par</u> on the development after cycle 9	...	27

1.5. Effects of cytoskeletal inhibitors on nuclear migration	...	30
1.6. Nuclear behavior in <u>RW630</u> embryos	...	31
1.7. Quantitative analysis of nuclear migration between cycles 1 and 2	...	32
1.7.1. Determination of three-dimensional positions of nuclei in cycle-1 and -2 embryos	...	33
1.7.2. Shift of nuclei as a whole along the anteroposterior axis during the period between cycles 1 and 2	...	35
1.7.3. Three-dimensional distance between two nuclei at cycle 2	...	36
1.7.4. Anteroposterior orientation of two nuclei at cycle 2	...	36
1.7.5. Dorsoventral orientation of two nuclei at cycle 2	...	37
2. F-actin distribution during cleavage stages	...	38
2.1. F-actin distribution in wild-type embryos	...	38
2.2. F-actin distribution in mutant embryos and phenocopies	...	41
2.3. Effects of <u>aur</u> and <u>elD</u> on F-actin distribution	...	43
3. Genetical analysis of <u>N441</u> , <u>N26</u> and <u>par</u>	...	44
3.1. Cytological mapping of <u>N26</u> and <u>N441</u>	...	44
3.2. Hemizygous phenotypes of mutants	...	46
3.3. Double mutation analysis	...	47
4. Cytological analysis of <u>tud</u> embryos	...	48
4.1. Nuclear penetration of polar plasm in <u>tud</u> embryos	...	48
4.2. F-actin distribution in <u>tud</u> pole buds	...	49
DISCUSSION	...	51
1. Mutants affecting cleavage-stage-specific organization of F-actin	...	52

1.1. Requirement of F-actin reorganization for nuclear migration and synchronous nuclear penetration of the whole periplasm	... 53
1.2. Positioning of the two nuclei at cycle 2	... 55
1.3. Nuclear migration in other insects	... 59
1.4. Genetical analysis	... 60
1.5. Defects in segmentation in the mutants	... 61
2. Mutants affecting F-actin organization in the syncytial blastoderm stage	... 62
3. Regulation of cytoskeletal elements during pole cell formation	... 64
