

## ACKNOWLEDGEMENTS

I gratefully acknowledge the stimulating discussions and incessant support of Professor Masukichi Okada throughout the course of this study. I greatly appreciate Dr. Fumiaki Maruo for his kind instruction in two-dimensional gel electrophoresis technique. I thank Dr. M. Masson for providing par stocks, Dr. D. Thierry-Mieg for the information about the par phenotype, Dr. D. F. Eberl for providing hfs stocks, Dr. C. M. Cheney for providing RW630 stocks and Dr. R. Lehmann for providing aur and eld stocks. I also thank Professor Makoto Katori (Kitasato University) and Electron Microscopy Laboratory Center (Kitasato University) for offering equipment to prepare the manuscript. Finally, I thank Dr. Shin Togashi, Dr. Maroko Myohara, Dr. Fumiaki Maruo, Dr. Satoru Kobayashi, Dr. Shin Sugiyama, Mr. Takahiro Akiyama and Mr. Yoshihito Yamazaki for their useful discussions.
