

## **Tables**

Table 1

## Sequences of target gene-specific PCR primers

|                        | Sequences                               | References                      |
|------------------------|---|---------------------------------|
| Desmin                 |   |                                 |
| Forward                | 5'-AGG CCT ACT CGT CCA GCC AGC GCG-3'   | Yamane <i>et al.</i> , 1998a    |
| Reverse                | 5'-CAT AGG ATG GCG CTC GGG TGG TCC-3'   |                                 |
| Myf5                   |   |                                 |
| Forward                | 5'-GAG CTG CTG AGG GAA CAG GTG GAG A-3' | Yamane <i>et al.</i> , 1998a    |
| Reverse                | 5'-GTT CTT TCG GGA CCA GAC AGG GCT G-3' |                                 |
| MyoD                   |   |                                 |
| Forward                | 5'-AGG CTC TGC TGC GCG ACC-3'           | Hannon <i>et al.</i> , 1992     |
| Reverse                | 5'-TGC AGT CGA TCT CTC AAA GCA CC-3'    |                                 |
| Myogenin               |   |                                 |
| Forward                | 5'-GAG CGC GAT CTC CGC TAC AGA GG-3'    | Hannon <i>et al.</i> , 1992     |
| Forward                | 5'-CTG GCT TGT GGC AGC CCA GG-3'        |                                 |
| MRF4                   |   |                                 |
| Forward                | 5'-GAG AGG AAC ACG TTC TGG CTC C-3'     | Hannon <i>et al.</i> , 1992     |
| Reverse                | 5'-TGC TGG AGG CTG AGG CAT CC-3'        |                                 |
| Muscle creatine kinase |   |                                 |
| Forward                | 5'-CAA TAA GCT TCG CGA TAA GGA G-3'     | Hollenberg <i>et al.</i> , 1993 |
| Reverse                | 5'-GAT GGG ATC AAA CAG GTC CTT G-3'     |                                 |
| Fast troponin C        |   |                                 |
| Forward                | 5'-TAC CTC AGC GAG GAG ATG ATC-3'       | Yamane <i>et al.</i> , 2000a    |
| Reverse                | 5'-CTC CCC AGA AGC CCG GAA AAT-3'       |                                 |
| Slow troponin C        |   |                                 |
| Forward                | 5'-GAT GAC ATC TAC AAA GCT GCG-3'       | Yamane <i>et al.</i> , 2000a    |
| Reverse                | 5'-AAT GGT CTC ACC TGT GGC CTG-3'       |                                 |
| GAPDH                  |   |                                 |
| Forward                | 5'-GAT GCT GGT GCT GAG TAT GTC G-3'     | Zhao <i>et al.</i> , 1995       |
| Reverse                | 5'-GTG GTG CAG GAT GCA TTG CTG A-3'     |                                 |
| IGF-I                  |   |                                 |
| Forward                | 5'-GCT CTT CAG TTC GTG TGT GG-3'        | Hannon <i>et al.</i> , 1992     |
| Reverse                | 5'-TTG GGC ATG TCA GTG TGG-3'*          |                                 |
| IGF-II                 |   |                                 |
| Forward                | 5'-CGT GGA AGA GTG CTG CTT CC-3'        | Hannon, 1992                    |
| Reverse                | 5'-GAC ATC TCC GAA GAG GCT CC-3'        |                                 |
| IGFR1                  |   |                                 |
| Forward                | 5'-TCT TGG ATG CGG TGT CCA ATA AC-3'    | Wada <i>et al.</i> , 1993       |
| Reverse                | 5'-GCA GCA CTC ATT GTT CTC GTT GC-3'    |                                 |
| IGFR2                  |   |                                 |
| Forward                | 5'-TGC ACA CTC TTC TCC TGG CA-3'        | Yamane <i>et al.</i> , 2000b    |
| Reverse                | 5'-GCA GAT GTT GAT ATA GAA GTC AGG-3'   |                                 |
| IGFBP1                 |   |                                 |
| Forward                | 5'-CCA GGG ATC CAG CTG CCG TGC G-3'     | Schuller <i>et al.</i> , 1994   |
| Reverse                | 5'-GGC GTT CCA CAG GAT GGG CTG-3'       |                                 |
| IGFBP2                 |   |                                 |
| Forward                | 5'-CAA CTG TGA CAA GCA TGG CCG-3'       | Schuller <i>et al.</i> , 1994   |
| Reverse                | 5'-CAC CAG TCT CCT GCT GCT CGT-3'       |                                 |
| IGFBP3                 |   |                                 |
| Forward                | 5'-GAC ACC CAG AAC TTC TCC TCC-3'       | Schuller <i>et al.</i> , 1994   |
| Reverse                | 5'-CAT ACT TGT CCA CAC ACC AGC-3'       |                                 |
| IGFBP4                 |   |                                 |
| Forward                | 5'-CGT CCT GTG CCC CAG GGT TCC T-3'     | Schuller <i>et al.</i> , 1994   |
| Reverse                | 5'-GAA GCT TCA CCC CTG TCT TCC G-3'     |                                 |
| IGFBP5                 |   |                                 |
| Forward                | 5'-GTT TGC CTC AAC GAA AAG AGC T-3'     | James <i>et al.</i> , 1993      |
| Reverse                | 5'-CTG CTT TCT CTT GTA GAA TCC TT-3'    |                                 |
| IGFBP6                 |   |                                 |
| Forward                | 5'-CCC CGA GAG AAC GAA GAG ACG-3'       | Schuller <i>et al.</i> , 1994   |
| Reverse                | 5'-CTG CGA GGA ACG ACA CTG CTG-3'       |                                 |

TABLE 2

Formulae for the regression lines and correlation coefficients for IGF-I, II, IGFR 1 and 2.

| Target gene | formula            | r    | significance |
|-------------|--------------------|------|--------------|
| IGF-I       | $y = 0.46x - 0.15$ | 0.99 | p<0.001      |
| IGF-II      | $y = 0.38x - 0.39$ | 0.99 | p<0.001      |
| IGFR 1      | $y = 0.52x - 0.64$ | 0.99 | p<0.001      |
| IGFR 2      | $y = 1.45x - 1.57$ | 0.99 | p<0.001      |

y, the logarithmic value of the ratio of the fluorescent intensity in the target gene band to that in its respective competitor band.

x, the logarithmic value of the concentration of the cDNA standard.

r, correlation coefficient.
