

Acknowledgements

I am grateful to Professor Mihoko Takahashi for her help in accomplishment of my study and teaching the scientific way of thinking. I wish to express my gratitude to Professor Kazuyuki Mikami for introducing me to enjoy study of ciliates and generously supplying the nucleotide sequence of *P. caudatum* genomic γ -tubulin gene. I would like to thank Doctor Osamu Matsuzaki for teaching of electron microscopy, Professor Osamu Numata for his help in making antibodies and for valuable suggestions, Professor Terumitsu Hori and Professor Jun-ichi Hayashi for invaluable reviewing this thesis and Professor Tamio Hirabayashi for his suggestions in solving technical problems. I also thank all member of Professor M. Takahashi's laboratory for many discussions and assistance. Special gratitude is left for Professor Emeritus Koichi Hiwatashi for critical reading of my manuscript and giving me how to enjoy science.

Finally, I would like to appreciate to my respectable parents for supporting to enjoy in Tsukuba University.
