Abstract	v
List of Tables	vii
List of Figures	x
Glossary	xiv
1. INTRODUCTION	1
1-1 BACKGROUND AND OBJECTIVES OF THE STUDY	1
1-2 REMOTELY SENSED DATA IN LANDSLIDE HAZARD STUDIES	2
1-3 GIS IN LANDSLIDE HAZARD STUDIES	4
2. STUDY AREA	5
2-1 LOCATION	5
2-2 TOPOGRAPHY	5
2-3 CLIMATE AND RIVERS	13
2-3-1 Drainage Network	13
2-4 GEOLOGY	13
2-5 LAND USE/COVER	18
2-6 LANDSLIDES IN THE STUDY AREA	20
3. RESEARCH REVIEWS, APPROACHES EMPLOYED AND ISSUES	22
3-1 DEFINITION AND CLASSIFICATION OF LANDSLIDES	22
3-2 CAUSES OF LANDSLIDES	22
3-3 HAZARD AND RISK	26
3-4 REMOTE SENSING , GIS AND LANDSLIDE HAZARD ASSESSMENT AND MAPPING	27
3-4-1 Remote Sensing and Remotely Sensed Data	27
3-4-1.1 Analogue remotely sensed data	29
3-4-1.2 Satellite system and digital remotely sensed data	30
3-4-2 Geographic Information Systems (GIS)	32
3-4-3 Assessment of Landslide Affected Areas Using Satellite Digital Data: the Approaches Employed and Issues	33
3-4-4 Landslide Hazard Assessment and Mapping: the Approaches Employed and Issues	34

4. ASSESSMENT OF LANDSLIDE AFFECTED AREAS USING SATELLITE DIGITAL DATA	42
4-1 METHODS OF ANALYSIS	42
4-1-1 The Remotely Sensed Satellite Digital Data	42
4-1-2 Pre-processing of TM data	45
4-1-2.1 Geometric rectification	45
4-1-2.2 Image normalization	46
4-1-3 Change Detection Techniques Examined in Detecting Landslide Affected Areas	48
4-1-3.1 Spectral image differencing	48
4-1-3.2 Vegetation index image differencing	60
4-1-3.3 Tasseled cap brightness image differencing	63
4-1-3.4 Spectral change vector analysis	63
4-1-3.5 Principal component analysis	67
4-2 RESULTS	70
4-2-1 Spectral Image Differencing	70
4-2-2 Vegetation Index Image Differencing	70
4-2-3 Tasseled Cap Brightness Image Differencing	70
4-2-4 Spectral Change Vector Analysis	76
4-2-5 Principal Component Analysis	76
4-2-6 Comparison of Different Methods in Differentiating Change vs. No Change	80
4-2-7 Detecting Different Kinds of Affected Areas Associated with Landsliding	80
4-2-7.1 Detection of landslides	83
4-3 DISCUSSIONS	93
4-3-1 Potential of Different Bands of TM Data for the Identification of Landslide Affected Areas	93
4-3-2 Evaluation of Change Detection Techniques	94
4-3-3 Identification of Landslides from the Multitemporal Landsat TM Data	96
5. LANDSLIDE HAZARD ASSESSMENT, MAPPING AND EVALUATION OF HAZARD MAPS	99
5-1 METHODS OF ANALYSIS	99
5-1-1 Data Acquisition and GIS Data Layers	101
5-1-2 Quantification Scalling Type II (Q-S II) Analysis	101
5-1-2.1 Sampling of landslide and non-landslide groups	105
5-1-2.2 Association between the factors	107
5-1-3 Failure Rate Analysis (FR Analysis)	107
5-2 RESULTS	110
5-2-1 Q-S II Analysis	110
5-2-2 FR Analysis	112
5-3 CLASSIFICATION OF HAZARD CLASSES AND MAPPING	112
5-4 EVALUATION OF HAZARD MAPS	115

5-4-1	Accuracy of Hazard Maps	118
5-4-2	Evaluation of Spatial Agreement	120
5-5	DISCUSSIONS	121
5-5-1	Factors and Classes Contributing to Landsliding	121
5-5-2	Methods of Analysis for Landslide Hazard Assessment	126
5-5-3	Delineation of Landslides Using Aerial Photographs	127
5-5-4	Geographic Information Systems and Landslide Hazard Mapping	128
6	SUMMARY AND CONCLUSIONS	129
	References	134
