1999

**A Novel RNA Aptamer that Binds  
to the Tat Protein of HIV with Extremely  
High Efficiency and Specificity**

**Division of Applied Biochemistry  
Doctoral Degree Program in Agricultural Sciences  
University of Tsukuba**

**Rika Yamamoto**

# Contents

<b>Abbreviations.....</b>	<b>4</b>
<b>Chapter 1</b>	
<b>General introduction.....</b>	<b>7</b>
<b>Chapter 2</b>	
<b>Isolation and characterization of an RNA that binds with high affinity to Tat proteins of HIV-1 and HIV-2 from a completely random pool of RNA .....</b>	<b>14</b>
Introduction.....	15
Materials and methods.....	18
Results .....	27
Discussion.....	57
<b>Chapter 3</b>	
<b>Aptamer RNA<sup>Tat</sup> as an inhibitory molecule .....</b>	<b>60</b>
Introduction.....	61
Materials and methods.....	63
Results .....	67
Discussion.....	77
<b>Chapter 4</b>	
<b>Modulating aptamer RNA for HIV-1 Tat: potential use in diagnostics and biosensors .....</b>	<b>79</b>
Introduction .....	80
Materials and methods.....	82
Results .....	85

Discussion.....95

## **Chapter 5**

**General discussion**.....97

**Acknowledgments**.....101
