

ACKNOWLEDGMENT

The author wishes to thank to the following organizations and individuals:

- (i) The supervisors: Professor Hiro'o Natori (the supervisor for a period of 1992-1996) and Professor Hiroshi Noda (the supervisor for a period of 1996-1998). This research would not have been materialized without their professional guidance. Also I would like to express my thanks to my friends are namely: De Silva, Dewi and Elsa who are still undergoing the doctorate course in the University of the Tsukuba, have been kindly enough in one way or another, assisted me while making the thesis presentation in the university in 1998 .
- (ii) Japan International Cooperation Agency (JICA) for sponsoring the course on the Planktic Foraminiferal Biostratigraphy study from the period of July 1992- June 1993, which was conducted in the Geological Survey of Japan. This work is then continued and submitted for Doctor of Philosophy (Geoscience) in the University of Tsukuba.
- iii) Mr. Andrew Tukau of Sarawak Timber Research, Forest Department Kuching, for the use of Scanning Electron Microscope to take pictures of the planktic foraminifers.
- vi) The Director and Staff of Geological Survey Malaysia Department, Kuching, Sarawak, for their kind assistance and encouragement during the course of this study especially Mr. Ling Nan Ley for improving the English and Mr. Hillary Muyan who had assisted in the fieldwork.
- vii) I would like to extend my sincere thanks to the staff of the Regional Geological Mapping Programme for the preparation of the samples and the staff in the Cartography Section for the preparation of the figures and maps.
- viii) Last but not the least, I would like to express my greatest appreciation to my family: my wife Josephine Timbong, my son Davies Belayong and my two daughters Ellis and Cynthia; for their constant encouragement and support, during the preparation of this thesis.
