

Acknowledgements

I would like to thank Professor Masahide Murakami, Institute of Engineering Mechanics and Systems, University of Tsukuba, for many discussions and advises to write the Ph. D. thesis. I also would like to thank the Committee members, Professor G. Matsui, Professor K. Matsuuchi, Professor T. Kawai and Associate Professor M. Nishioka, Institute of Engineering Mechanics and Systems, University of Tsukuba, for their important advice to write this thesis. And I would especially like to thank to Professor Yoshimoto Onishi, Tottori University, Department of Applied Mathematics and Physics, Professor Yoshio Sone, Kyoto University, Department of Aeronautics and Astronautics Engineering and Dr. Tadashi Matsushita, Space Systems Division, Hitachi Ltd. for important discussions. Thanks are also due to the member of Murakami laboratory.

The financial support for the study in University of Tsukuba has been given by Japan Air Self Defense Force. Also I would like to thank Professor Kazumasa Moriya, Department of Aerospace Engineering, National Defense Academy for his encouragement in going to University of Tsukuba to study for Ph. D.

Finally, I would like to thank my family for their positive support during the study for Ph. D.
