# Contents

**1 INTRODUCTION** 1

1.1 Transient Evaporation Phenomena . . . . . 2

1.2 Condensation Coefficient . . . . . 3

1.3 Reflection of a Second Sound on a Free Surface . . . . . 6

1.4 Effect of Super Thermal Conduction on He II Condensation 7

**2 SUPERFLUID HELIUM** 9

2.1 Superfluid Helium . . . . . 9

2.2 Two-Fluid Model for He II . . . . . 11

2.3 Landau Two-Fluid Equations . . . . . 13

2.4 Two Mode of Sound Wave Propagation in He II . . . . . 14

2.5 Thermal Shock Wave in He II . . . . . 20

**3 EXPERIMENTAL SETUP AND PROCEDURE** 23

3.1 Pressure and Temperature Measurements . . . . . 24

3.1.1 He II dewar and evacuation system . . . . . 24

3.1.2 Experimental cell . . . . . 26

3.1.3 Pressure transducer . . . . . 28

3.1.4 Superconductive temperature sensor . . . . . 30

3.1.5 Procedure . . . . . 34

3.2 Visualization . . . . . 36

3.2.1 Laser holographic interferometer . . . . . 36

3.2.2 Cryostat and evacuation system . . . . . 38

3.2.3 Experimental cell . . . . . 40

3.2.4 Procedure . . . . . 41

**4 TRANSIENT EVAPORATION PHENOMENA 43**
4.1 Introduction . . . . . 43
4.2 Visualization . . . . . 44
4.3 Temperature Measurement in He II . . . . . 48
4.4 Evaporation Wave . . . . . 51
4.4.1 Pressure measurement . . . . . 51
4.4.2 Temperature measurement . . . . . 53
4.4.3 Density measurement . . . . . 55
4.4.4 Rankine-Hugoniot relation . . . . . 56
4.5 Kinetic Theory Analysis for Evaporation Problem . . . . . 58
4.5.1 Weak evaporation . . . . . 59
4.5.2 Strong evaporation . . . . . 60
4.6 Comparison of Experimental Result with Slip Boundary Condition . . . . . 61
4.7 Non-linear Property of Slip Boundary Condition . . . . . 63
4.8 Numerical Simulation of Vapor Flow Region . . . . . 67
4.9 Concluding Remarks . . . . . 70

**5 CONDENSATION COEFFICIENT OF He II 74**
5.1 Introduction . . . . . 74
5.2 Temperature Dependence of Condensation Coefficient . . . 74
5.3 Concluding Remarks . . . . . 78

**6 REFLECTION OF A SECOND SOUND 79**
6.1 Introduction . . . . . 79
6.2 General Boundary Condition of He II-Vapor Interface . . . 79
6.3 Reflection on He II Free Surface . . . . . 82
6.3.1 Theoretical reflection coefficient . . . . . 82
6.3.2 Comparison of experimental result with theoretical value of $R_{22}$ . . . . . 84
6.4 Reflection on Rigid Wall . . . . . 85
6.4.1 Experimental setup . . . . . 86
6.4.2 Visualization . . . . . 87

6.4.3 Reflection coefficient . . . . . 88
6.5 Concluding Remarks . . . . . 89

**7 EFFECT OF SUPER THERMAL CONDUCTION ON He II CONDENSATION 91**
7.1 Introduction . . . . . 91
7.2 Effect of Super Thermal Conduction . . . . . 93
7.3 Reflection Property of Evaporation Wave on He II Free Surface 95
7.4 Concluding Remarks . . . . . 96

**8 CONCLUSIONS 98**

**A Numerical Simulation of Vapor Flow Region 101**
A.1 One-Dimensional Equations . . . . . 101
A.2 Boundary Condition . . . . . 102
A.3 Finite Difference Computation Scheme . . . . . 102
A.3.1 MacCormack Finite Difference Scheme . . . . . 102
A.3.2 Flux-corrected Transport Algorithm . . . . . 103

**B Chernikova-Khalatnikov Theory 105**
