# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Background</b>	<b>3</b>
2.1	Banyan Networks . . . . .	3
2.2	Dilated Banyan Networks . . . . .	5
2.3	Output Rates of the Original and the 2-Dilated Banyan Networks . . . . .	7
<b>3</b>	<b>Hybrid Dilated Banyan Networks</b>	<b>9</b>
3.1	The Structure of Hybrid Dilated Banyan Networks . . . . .	9
3.2	Comparison of a Hybrid Dilated Banyan Network with Delta, Rerouting Banyan and Tandem Networks . . . . .	14
3.2.1	Routing Process and Hardware Size . . . . .	14
3.2.2	Delay . . . . .	16
3.2.3	Switching Efficiency . . . . .	17
3.2.4	Flexibility for Network Designs . . . . .	17
3.2.5	The Results of Comparison . . . . .	18
<b>4</b>	<b>Networks with Bypasses</b>	<b>20</b>
4.1	$4 \times 2$ Re-Arrangeable Output Switching Element with Bypasses . . . . .	20
4.1.1	Usage of One or Two Bypasses at the Stage of $4 \times 2$ Re-Arrangeable Output Switching Elements . . . . .	22
4.1.2	Input Rate and Output Rate of Hybrid Dilated Banyan Network with One or Two Bypasses at the Stage of $4 \times 2$ Re-Arrangeable Output Switching Elements . . . . .	22
4.2	Original and 2-Dilated Banyan Networks with Bypasses . . . . .	26
4.2.1	Input Rate and Output Rate of Banyan Network with Bypasses . . . . .	28
4.2.2	Input Rate and Output Rate of 2-Dilated Banyan Network with Bypasses . . . . .	30
4.3	Comparison of Output Rates of Networks with and without Bypass . . . . .	33

4.4	Original and 2-Dilated Banyan Networks with One-Bypass-Connection . . . . .	37
4.5	One-Bypass-Connection at Two Neighbored Stages . . . . .	41
4.6	Adaptation of Bypasses to Other Networks . . . . .	43
<b>5</b>	<b>Hybrid Dilated Banyan Networks with Bypasses</b>	<b>45</b>
5.1	Hybrid Dilated Banyan Networks with All-Bypass-Connection . . . . .	45
5.2	Usage of $4 \times 2$ Re-Arrangeable Output Switching Element with Bypass in the Hybrid Dilated Banyan Network. . . . .	49
5.2.1	Input Rate and Output Rate of $4 \times 2$ Re-Arrangeable Output Switching Elements with Bypasses . . . . .	49
5.2.2	Comparisons of the Output Rates of Hybrid Dilated Banyan Networks with and without Bypasses at the stage of $4 \times 2$ Re-Arrangeable Output Switching Elements . . . . .	52
5.3	Hybrid Dilated Banyan Networks with One-Bypass-Connection . . . . .	56
5.4	Hybrid Dilated Banyan Networks with One-Bypass-Connection at Two Neighbored Stages . . . . .	60
<b>6</b>	<b>Conclusion</b>	<b>62</b>
	<b>Reference</b>	<b>65</b>
	<b>Acknowledgments</b>	<b>69</b>
<b>A</b>	<b>Analysis of Switching Elements</b>	<b>70</b>
A.1	Analysis of Input Rate and Output Rate of Switching Elements . . . . .	70
A.1.1	Input Rate and Output Rate of Banyan Switching Elements . . . . .	70
A.1.2	Input Rate and Output Rate of 2-Dilated Banyan Switching Elements . . . . .	74
A.1.3	Input Rate and Output Rate of $4 \times 2$ Re-Arrangeable Output Switching Elements . . . . .	80
A.1.4	Input Rate and Output Rate of $4 \times 2$ Re-Arrangeable Output Switching Elements with Two Bypasses . . . . .	87
A.1.5	Input Rate and Output Rate of $2 \times 4$ Re-Arrangeable Input Switching Element . . . . .	91
A.2	The Structures of Switching Elements and the Estimation of the Hardware Size and Delay . . . . .	92
A.2.1	Banyan Network . . . . .	92

A.2.2	2-Dilated Banyan Network . . . . .	95
A.2.3	Hybrid Dilated Banyan Network . . . . .	99

# List of Figures

2.1	$2 \times 2$ banyan switching elements. . . . .	3
2.2	$8 \times 8$ banyan network with three stages. . . . .	4
2.3	$16 \times 16$ 2-dilated banyan network with four stages. . . . .	6
2.4	The output rate of original banyan and 2-dilated banyan network at input rate = 1.0. . . . .	7
3.1	The structure of hybrid dilated banyan network. . . . .	9
3.2	$16 \times 16$ hybrid dilated banyan network. . . . .	10
3.3	Output rate vs. the number of stages at input rate = 1. . . . .	11
3.4	Output rate vs. the number of stages at input rate = 0.75. . . . .	12
3.5	Output rate vs. the number of stages at input rate = 0.50. . . . .	13
3.6	Output rate vs. the number of stages at input rate = 0.25. . . . .	14
4.1	$4 \times 2$ re-arrangeable upper switching element and lower output switching element with two bypasses. . . . .	21
4.2	$16 \times 16$ hybrid dilated banyan network with a bypass at the stage of $4 \times 2$ re-arrangeable output switching element. . . . .	23
4.3	$16 \times 16$ hybrid dilated banyan network with two bypasses at the stage of $4 \times 2$ re-arrangeable output switching element. . . . .	24
4.4	The output rate of the hybrid dilated banyan networks with and without bypass at the stage of $4 \times 2$ re-arrangeable output switching element. . . . .	25
4.5	$8 \times 8$ banyan network with bypasses. . . . .	26
4.6	$16 \times 16$ 2-dilated banyan network with bypasses. . . . .	27
4.7	Banyan switching element Type 1. . . . .	28
4.8	Banyan switching element Type 2. . . . .	29
4.9	Banyan switching element Type 3. . . . .	29
4.10	Banyan switching element Type 4. . . . .	30
4.11	2-dilated banyan switching element Type 1. . . . .	30
4.12	2-dilated banyan switching element Type 2. . . . .	31

4.13	2-dilated banyan switching element Type 3. . . . .	32
4.14	2-dilated banyan switching element Type 4. . . . .	32
4.15	2-dilated banyan switching element Type 5. . . . .	33
4.16	The output rates of banyan networks with and without bypass at input rate = 1.0. . . . .	35
4.17	The output rates of banyan networks with and without bypass at input rate = 0.5. . . . .	35
4.18	The output rates of 2-dilated banyan networks with and without bypass at input rate = 1.0. . . . .	36
4.19	The output rates of 2-dilated banyan networks with and without bypass at input rate = 0.5 . . . . .	36
4.20	$8 \times 8$ banyan network with one-bypass-connection. . . . .	37
4.21	$16 \times 16$ 2-dilated banyan network with one-bypass-connection. . . . .	38
4.22	The output rates of banyan networks with one-bypass-connection, all-bypass- connection and no bypass at input rate = 1.0 . . . . .	40
4.23	The output rates of 2-dilated banyan networks with one-bypass-connection, all- bypass-connection and no bypass at input rate = 1.0 . . . . .	40
4.24	The output rates of banyan networks with one-bypass-connection at two neigh- bored stages and the whole stages, all-bypass-connection and no bypass at input rate = 1.0 . . . . .	42
4.25	The output rates of 2-dilated banyan networks with one-bypass-connection at two neighbored stages and the whole stages, all-bypass-connection and no bypass at input rate = 1.0 . . . . .	43
5.1	The structure of $32 \times 32$ hybrid dilated banyan network with bypasses at 2- dilated banyan switching elements. . . . .	46
5.2	The structure of $32 \times 32$ hybrid dilated banyan network with bypasses at banyan switching elements. . . . .	47
5.3	The output rate of $2^8 \times 2^8$ hybrid dilated banyan networks at input rate = 1.0. . . . .	48
5.4	$4 \times 2$ re-arrangeable output switching element Type 1. . . . .	50
5.5	$4 \times 2$ re-arrangeable output switching element Type 2. . . . .	51
5.6	$4 \times 2$ re-arrangeable output switching element Type 3. . . . .	52
5.7	The output rate of hybrid dilated banyan networks with bypasses at the whole stages including the stage of $4 \times 2$ re-arrangeable output switching elements. . . . .	54

5.8	The output rate of hybrid dilated banyan networks with bypasses and at the stages of 2-dilated banyan switching elements and $4 \times 2$ re-arrangeable output switching elements. . . . .	54
5.9	The output rate of the networks with bypasses at the stages of banyan switching elements and $4 \times 2$ re-arrangeable output switching elements. . . . .	55
5.10	The output rate of the networks with all-bypass-connection at the stage of $4 \times 2$ re-arrangeable output switching elements. . . . .	55
5.11	$32 \times 32$ hybrid dilated banyan network with one-bypass-connection. . . . .	56
5.12	The output rate of hybrid dilated banyan networks with one-bypass-connection under the condition of $4 \times 2$ re-arrangeable output switching elements have no bypass. . . . .	58
5.13	The output rate of hybrid dilated banyan networks with all-bypass-connection or one-bypass-connection under the condition of whether $4 \times 2$ re-arrangeable output switching elements have bypasses or not. . . . .	58
5.14	The output rate of hybrid dilated banyan networks with one-bypass-connection or without bypass under the condition of whether $4 \times 2$ re-arrangeable output switching elements have bypasses or not. . . . .	59
5.15	The output rate of hybrid dilated banyan networks with one-bypass-connection at two neighbored stages. . . . .	60
A.1	Banyan switching element Type 2. . . . .	71
A.2	Banyan switching element Type 1. . . . .	73
A.3	Banyan switching element Type 3. . . . .	73
A.4	Banyan switching element Type 4. . . . .	74
A.5	2-dilated banyan switching element Type 2. . . . .	74
A.6	2-dilated banyan switching element Type 1. . . . .	79
A.7	2-dilated banyan switching element Type 3. . . . .	79
A.8	2-dilated banyan switching element Type 4. . . . .	80
A.9	$4 \times 2$ re-arrangeable output switching elements Type 2. . . . .	81
A.10	$4 \times 2$ re-arrangeable output switching element Type 1. . . . .	85
A.11	$4 \times 2$ re-arrangeable output switching element Type 3. . . . .	86
A.12	The lower switching element. . . . .	87
A.13	The upper switching element. . . . .	89
A.14	$2 \times 4$ re-arrangeable input switching element. . . . .	91
A.15	Original banyan switching element. . . . .	92

A.16 Banyan switching element with bypasses. . . . .	93
A.17 2-dilated banyan switching element. . . . .	95
A.18 $2 \times 4$ re-arrangeable input switching element. . . . .	96
A.19 $4 \times 2$ re-arrangeable output switching element. . . . .	96
A.20 2-dilated switching element with bypasses. . . . .	97
A.21 $4 \times 2$ re-arrangeable output switching element with bypasses. . . . .	100
