# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Mathematical Preliminary</b>	<b>5</b>
2.1	Logic Programs . . . . .	5
2.1.1	Syntax . . . . .	5
2.1.2	Semantics . . . . .	7
2.1.3	Deduction . . . . .	9
2.2	Generalization of Logic Programs . . . . .	9
2.2.1	Least General Generalization . . . . .	9
2.2.2	Relative Least General Generalization . . . . .	12
2.3	$\psi$ -terms . . . . .	13
2.3.1	Syntax . . . . .	13
2.3.2	Semantics . . . . .	15
2.3.3	Deduction over $\psi$ -terms . . . . .	16
<b>I</b>	<b>Extension of Inductive Logic Programming</b>	<b>21</b>
<b>3</b>	<b>Inductive Learning of Logic Programs</b>	<b>23</b>
3.1	Inductive Concept Learning . . . . .	23
3.2	Inductive Logic Programming (ILP) . . . . .	24
3.2.1	Framework . . . . .	24
3.2.2	Hypothesis Space . . . . .	26
3.2.3	Search Bias . . . . .	26
3.2.4	Language Bias . . . . .	27
3.2.5	Previous ILP Systems . . . . .	28

<b>4 RHB: ILP System that Learns Logic Programs with Sorts from Positive and Negative Examples</b>	<b>31</b>
4.1 Problems in Previous ILP . . . . .	31
4.1.1 Problems in Top-Down Learners . . . . .	31
4.1.2 Problems in Bottom-Up Learners . . . . .	32
4.2 System Overview . . . . .	32
4.2.1 Framework . . . . .	33
4.3 Model Complexity Measure . . . . .	34
4.4 Code Length of $\tau$ -terms . . . . .	35
4.5 Algorithm of RHB . . . . .	37
4.5.1 Least General Generalization of $\tau$ -terms . . . . .	37
4.5.2 Dynamic Sort Restriction . . . . .	38
4.6 Experiments and Results . . . . .	39
4.6.1 Learning Time and Sort Hierarchy Size . . . . .	39
4.6.2 Comparison of Accuracy . . . . .	40
4.7 Related Work . . . . .	41
4.8 Summary . . . . .	42
<b>5 RHB<sup>+</sup>: ILP System that Learns Logic Programs with Sorts from Positive Examples</b>	<b>45</b>
5.1 Overview . . . . .	45
5.1.1 Framework . . . . .	46
5.2 Algorithms of RHB <sup>+</sup> . . . . .	47
5.2.1 Dynamic Sort Restriction by Positive Examples .	48
5.2.2 Use of Sorts in Computing Informativity . . . . .	51
5.2.3 Use of Sorts in the Stopping Condition . . . . .	52
5.3 Experiments and Results . . . . .	53
5.3.1 Learning Time and Sort Hierarchy Size . . . . .	53
5.4 Related Work . . . . .	54
5.5 Summary . . . . .	55
<b>6 <math>\psi</math>-RHB<sup>+</sup>: ILP System that Learns Logic Programs based on <math>\psi</math>-terms</b>	<b>57</b>
6.1 Overview of $\psi$ -RHB <sup>+</sup> . . . . .	57
6.1.1 Framework . . . . .	57
6.1.2 Characteristics of $\psi$ -terms . . . . .	58
6.1.3 Least General Generalization . . . . .	59

6.2	Algorithm of $\psi$ -RHB <sup>+</sup>	60
6.3	Discussion	62
6.4	Summary	63
<b>7</b>	<b>Sample Trace of the Three Learners</b>	<b>65</b>
7.1	RHB	65
7.2	RHB <sup>+</sup>	67
7.3	$\psi$ -RHB <sup>+</sup>	68
<b>II</b>	<b>Application to Information Extraction</b>	<b>69</b>
<b>8</b>	<b>Applying Extended Inductive Logic Programming to Information Extraction</b>	<b>71</b>
8.1	Overview	71
8.2	Problems in IE	72
8.3	Our Approach to IE Tasks	72
8.4	Evaluation Metrics	73
8.5	Natural Language Processing Resources	74
8.5.1	The Semantic Attribute System	74
8.5.2	Verb Case Frame Dictionary	75
8.5.3	Natural Language Processing Tools	76
<b>9</b>	<b>Application to a New Product Release Domain</b>	<b>79</b>
9.1	Applying RHB <sup>+</sup>	79
9.1.1	Illustration of a Learning Process	79
9.1.2	Setting of Experiments	82
9.1.3	Results	83
9.2	Applying $\psi$ -RHB <sup>+</sup>	83
9.2.1	Setting of Experiments	84
9.2.2	Results	84
9.3	Discussion	84
9.4	Summary	85
<b>10</b>	<b>Application to an Accident Domain</b>	<b>87</b>
10.1	Applying RHB <sup>+</sup>	87
10.1.1	Setting of Experiments	87

10.1.2	Results . . . . .	88
10.2	Applying $\psi$ -RHB <sup>+</sup> . . . . .	89
10.2.1	Setting of Experiments . . . . .	89
10.2.2	Results . . . . .	90
10.3	Discussion . . . . .	91
10.4	Summary . . . . .	92
<b>11</b>	<b>Related Work</b>	<b>93</b>
<b>12</b>	<b>Conclusions</b>	<b>95</b>
12.1	Summary . . . . .	95
12.2	Future Work . . . . .	95

# List of Figures

2.1	OSF Clause Normalization Rules . . . . .	18
3.1	Sample Data . . . . .	23
3.2	Four Types of Coverage . . . . .	24
3.3	Sample Hypothesis Space . . . . .	26
4.1	Learning Time vs Sort Hierarchy Size . . . . .	40
4.2	Accuracy vs Example Size . . . . .	41
4.3	Learning Time vs Example Size . . . . .	42
5.1	Learning Time vs Sort Hierarchy Size . . . . .	54
8.1	Block Diagram of IE using ILP . . . . .	72
8.2	Upper Levels of a Sort Hierarchy . . . . .	75

# List of Tables

3.1 Previous ILP Systems . . . . .	30
4.1 Code Length of Example Clauses . . . . .	36
8.1 Case Frame of the Sample Sentence . . . . .	77
8.2 Case-Roles . . . . .	78
9.1 Sample Sentences . . . . .	79
9.2 Learning Results of New Product Release . . . . .	83
9.3 Learning Results of New Product Release . . . . .	85
10.1 Learning Results of “death toll” . . . . .	88
10.2 Learning Results of “injury” . . . . .	88
10.3 Comparison between RHB <sup>+</sup> and $\psi$ -RHB <sup>+</sup> . . . . .	90
10.4 Learning Results of Accidents . . . . .	91
