

Acknowledgements

I would express my gratitude to Dr. Shoji Harada (Inst. Community Med, Univ. of Tsukuba) for his kind instruction and many suggestions for this study, and for critically reading the manuscript. I deeply appreciate Dr. Norio Ohkoshi (Inst. Clinical Med, Univ. of Tsukuba), Dr. Akito Hayashi (Inst. Clinical Med, Univ. of Tsukuba) and Dr. Kazuo Yoshizawa (National Mito Hospital) for providing blood samples and the clinical data for patients with PD, and also Mrs. Takako Nakamura for her technical assistance.

I would also express my thanks to Dr. Susumu Oda (International Univ. of Health and Welfare), Dr. Yoji Nakatani (Inst. Community Med, Univ. of Tsukuba) and Mrs. Sumi Sugawara (Keio junior college of Nursing) for their warm encouragement during the course of my study. Finally I thank to members of Mental Health as well as Legal Medicine (Inst. Community Med, Univ. of Tsukuba) for their kind suggestions for this study.

This paper was dedicated to my parents (Hisashi and Fumi), Keiko and Shinji.
